Real-World Genetics **PRODUCTION SALE**

SATURDAY, FEB. 3, 2024

12 PM CT • At the Ranch • St. Anthony, ND

1,200 Angus Sell!

370 Powerful Bulls & 830 Commercial Females

*Free Bull Keep & Delivery • Large Sire Groups
Marketing Assistance • Genomics Tested*

FEATURED SIRES: Badlands, Three Rivers,
Turn Key, Prolific, Barricade, Profound, Deep River,
Rider Pride, Rush, Thedford & Pilot

Real-world genetics are the focus at Ellingson Angus. Our program is carefully engineered using large pools of data collected on our cowherd – from growth and carcass to feet, udders and fertility – and coupled with genomics, keen evaluation of conformation and experience garnered from working with our commercial clients.

Real-World Balanced-Trait Genetics

The only way for a calf to express its genetic merit is for it to survive and grow. That requires a **multiple-trait genetic package**. At Ellingson Angus, we have always made mating decisions based on multiple traits instead of single-trait selection. We emphasize real-world traits like **calf vigor**, **maternal functionality** and **performance**. The sale is comprised of bulls that will produce calves in demand by the feedlots and females that will keep you in the cattle business.

Behind every great Ellingson bull is a great female!

We take pride in our cowherd. It is the product of **strategic breeding** and **strict culling** for decades. We know that a good cowherd is measured by more than EPDs. We know that **fleshing** and **mothering ability**, **foot** and **udder structure** and **longevity** are not "convenience" traits, but essential traits for producing a profit.

What are you investing in when purchasing Ellingson Angus bulls?

All our work throughout the year is geared toward providing commercial cattle producers with a **consistent, superior product** and ensuring their investment is creating value for them. Our program is built on three pillars – **Genetics, Product** and **Service**. In a crowded and competitive seedstock marketplace, you can find bits and pieces of these in many places; however, **nowhere else** can you find the same **complete package** as you can at Ellingson Angus.

• Genetics •

Ruthless Culling of our Cowherd

We have a zero tolerance for problem cows. Any cow that fails to meet our standards disqualifies her from the opportunity at a chance to get bred and is instead shipped as a cull.

A Cowherd Managed Like Yours

We manage our cowherd just like you do – in a no-frills, real-world environment. It contributes to their longevity and gives you a picture of them in their true working clothes.

We Utilize Ellingson-Prefix Sires

You will notice that our offering is sired by primarily sires that stem directly from our herd. We do so because we have faith in our program and you can too.

A Progressive ET Program

We are identifying the top 5 percent of our cowherd annually and then multiplying these genetics to produce nearly half of the bulls that we sell.

Mating for Optimum Outcomes, Not Extremes

Discovering the ideal percentile range for every trait we measure and understanding how those traits correlate with one another guides us to create the phenotypic makeup desired by our customers. We breed cattle toward "the middle" for most all commercially relevant traits. That's the best method to drive genetic progress on all traits. By continually breeding our cowherd to the middle, we feel our matings can be more about matching kind to kind and less about mating one extreme to the other, thus creating more consistency in the ascending generations.

• Product •

Large Sire Groups of 1/2, 3/4 and full brothers

The Ellingson Angus sale offering includes many large groups of 1/2, 3/4 and even full brothers. This gives our bull buyers the opportunity to select bulls that are alike in kind at an affordable price. This also can help increase the uniformity in your calfcrop.

Bulls are Phenotypically Stout and Sound and have High Libido

Bulls that yield the highest customer satisfaction are the ones that stick around for many breeding seasons. To accomplish that, we know they need to breed lots of cows, have something to them to make it through the lean times of the year and stay sound. That is the kind we aim to raise.

Traits Measured Using a Complete Toolbox

Utilizing an all-of-the-above approach, including our eyes, genomic analyses and actual data, helps ensure the most accurate prediction of the genetic merit of each animal. Information is power, and we want you to have all the tools you need to make the right selection for your situation and your success.

Guarantee Like None Other

We know how important the dollars you invest in building a bull battery are. They need to provide a return. We understand that, when you deal with livestock, problems can arise. Rest assured, if a problem does arise with your Ellingson Angus purchase, we will make it right.

• Service •

Feeder Calf Marketing Assistance

We have established relationships with multiple feedlots who have had great success feeding Ellingson-Angus-sired cattle and are on the hunt for them.

Replacement/Bred Female Marketing Assistance

We have created a strong following of heifer developers and cow-calf ranches seeking to purchase Ellingson-sired females at a premium.

Personal Attention to your Program

We thoroughly enjoy spending one-on-one time getting to know a producers' needs. We've found in doing so, we can create more satisfied customers by helping them find the bulls that will and won't work for them.

Developing Relationships that Last

Maintaining contact with our clients throughout the year is a priority for us. Getting their feedback and making it to their operations to see firsthand what is and isn't working helps us refine our own breeding program. •

Real-World Maternal Genetics

The **maternal strength** of a cowherd is the footing that a successful outfit is built upon. We're pleased to again be offering a volume selection of commercial females from some of our top commercial clients. These females come from cowherds that have been selected and culled upon for generations based on the essential traits. They come from no-nonsense outfits that sell some of the highest valued feeder cattle in the Upper Great Plains each year.

Build the Maternal Foundation of Your Herd!

EA QUEEN 8070

We are selling a flush to the bull of the buyer's choice on this Pathfinder dam of the \$175,000 Ellingson Prolific in the Angus at the Congress Sale in Oklahoma City, Okla., on Jan. 4, 2024.

A HUGE SELECTION OF COMMERCIAL FEMALES WILL SELL IMMEDIATELY AFTER OUR BULL SALE.

At the conclusion of our bull sale, there will be a front-end selection of females from some of our long-time bull customers. These females are from ranches that make their living in the cattle business. These females are descendants of cows that possess functionality, production and maternal excellence.

These females are sired by Ellingson Angus bulls and have been on a complete herd health program. The bred females will have been preg-checked with calving dates confirmed and will sell in short calving intervals. If profitability in the cow business is what you seek, then plan to be with us.

Sale Location & Lodging

The sale will be held at our ranch sale facility near St. Anthony, N.D., located approximately 30 minutes from Bismarck/Mandan, N.D. From Mandan, go 19 miles south on Highway 6 until County Road 135. There, turn left (east) and follow the gravel road for 5 miles to the ranch and sale site. Use Google Maps, not GPS, for directions. A block of rooms has been reserved at the Comfort Inn & Suites in Mandan. To make reservations, call (701) 751-7484 and mention the Ellingson Angus Sale to take advantage of the discounted rate. The room block will be released Jan. 19.
