

Ellingson Angus
2018

Real-World Genetics

ANNUAL PRODUCTION SALE

1 pm CT • Saturday, Feb. 3, 2018

At the Ranch • St. Anthony, ND

Welcome!

Dear Friends,

Our family would like to personally invite you to join us on Saturday, Feb. 3, as we showcase the best genetic offering we have ever raised. We have been diligently designing these cattle for generations, and we are excited to show you the fruits of our labor.

No matter if you are a commercial producer or a registered producer, I think you will find our 2018 offering to be full of new opportunities. We have new sire groups that combine the performance you need to enhance payweight and the maternal backing you depend on to keep you in business for the long term. As always, we have carefully selected sires that will not only deliver the easily measured traits, but also the convenience traits that are too often overlooked. For generations, we have strictly culled for feet, udders, disposition and functionality. While we realize cattle can have great genetic tabulations while possessing problems in convenience traits, we fully realize cattle that don't combine a full genetic package won't be profitable in the long run either.

The greatest strength of our sale offering stems from the cowherd that is responsible for producing these bulls and females. We welcome you to come study our cows. I am proud of our cowherd, as it is consistent in type and power. We believe a cow that is disciplined in mature height, deep and wide will consistently produce the heaviest calves in even the most adverse conditions year after year. While maternal breeding values should be studied, it is still very important to select your genetics from cows that are the type and kind that will be productive and efficient over the long term.

It's our pleasure to work with so many progressive cattle producers who have chosen to do business with Ellingson Angus. We know that selection of bulls and females for your herd constitutes one of the most important decisions you make on your operation each year. For this reason, we put our heart and soul into producing the best cattle we can to ensure your decision to do business with us enhances your operation's success.

We welcome old and new customers. We aim to provide the genetics that you are seeking and pledge to you that your purchase will only be the first step in our relationship, because we are committed to your success with our seedstock and in the cattle business.

Sincerely,

~ Chad Ellingson

Ellingson Angus

ANNUAL PRODUCTION SALE

Saturday, Feb. 3, 2018

Lunch at 11:30 a.m. • Sale at 1 p.m. • At the Ranch • St. Anthony, ND

Sale-Day Phones

Office: (701) 445-7309 or (701) 445-7300

Chad's cell: (701) 361-3606 • Julie's cell: (701) 214-7709

Stetson's cell: (701) 595-1364 • Jameson's cell: (701) 226-8645

Sale Location

The sale will be held at our ranch sale facility near St. Anthony, N.D., located approximately 30 miles from Bismarck/Mandan, N.D. From Mandan, go 19 miles south on Highway 6 until County Road 135. There, turn left (east) and follow the gravel road for 5 miles to the ranch and sale site. Use Google Maps, not GPS, for directions.

Lodging

A block of rooms has been reserved at the Ramkota Hotel in Bismarck for \$99 plus tax. To make reservations, call (701) 258-7700 and mention the Ellingson Angus Sale to take advantage of the discounted rate.

Guarantee

These animals have been managed carefully to ensure your success. The cattle are guaranteed to be fertile and reproductively sound in accordance with the recommendations of the American Angus Association. The bulls left for later delivery will have a semen evaluation before delivery.

Terms of Sale

Settlement is to be made on sale day. Cattle will not be released until payment is received. All registered animals will be transferred. One-hundred percent revenue-sharing interest is being sold on all bulls with only within-herd semen use being retained.

Sight-Unseen Purchases

If you are unable to attend the sale, but wish to place a bid, call Chad, Julie or Stetson Ellingson, Pat Maher, the auctioneer or any of the sale-day representatives. We will handle your bid like you would if you were sitting in the stands yourself. Your complete satisfaction is guaranteed. Our sale will also be broadcast live on DVAuction, which also offers real-time and proxy bidding options. For information, contact Justin Dikoff at (605) 290-0635 or jdikoff@dvauction.com.

Genetic Testing

All cattle in the sale that are suspect by pedigree for any known genetic defects have been determined free by DNA testing. Lot 1, 2, 4, 6, 10, 12, 13, 14, 18, 22, 36, 37, 38, 40, 41, 42, 44, 46, 47, 48, 49, 50, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 70, 73, 74, 81, 82, 85, 87, 90, 91, 100, 103, 104, 105, 109, 115, 132, 134, 141, 145, 158, 159, 160, 161, 165, 166, 168, 178, 183, 184, 187, 194, 195, 197, 198, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 212, 213, 214, 215, 216, 217, 218, 219, 220, 222 and 228 have had the Zoetis 50K analysis.

Performance Data

The performance information, with the exception of the 365-day weights, has been calculated through the Angus Herd Improvement Records (AHIR) program of the American Angus Association. These are official numbers from the organization's Sire Summary (as of Dec. 8, 2017). At the time of printing, most of the bulls didn't fit the age parameters to process adjusted yearling weights through AHIR. Projected yearling weights noted were calculated using the American Angus Association's yearling weight formula. There will be a supplement sheet available on sale day with ultrasound data and scrotal measurements.

Health

Dr. Pat Bierman of Mandan Veterinary Clinic will be on hand to write interstate health certificates for those requiring them. All cattle have had a complete vaccination program.

Delivery

We are offering free delivery on all bulls to central points in the United States and to Canadian points-of-entry. For all females, we will help coordinate delivery to get the cattle to you as economically as we can.

Feeding Arrangements at No Charge

We are offering free keep on the bulls until April 1, after which time we will start deliveries. If you decide to take your bull home within three days of the sale, we will give you \$100 off your bull. Free keep and free delivery do not apply to the females in the sale.

Photographs

The photographs included in this catalog of the 2018 offering were taken at the ranch Nov. 21-22, 2017.

SAV Blackclass 374

After analyzing his impressive calfcrop and the bull himself, almost every visitor to the ranch over the past year has decided to incorporate Roughrider into their program.

Roughrider's progeny are performance oriented, just like the Earnans, but offer more natural base width and a more moderate frame score. He injects as much softness and rib as any sire we have ever used.

His dam and granddam both are serving on our donor roster and will have a strong influence on our program for years to come.

He has many progeny due here again in Spring 2018.

We own him with Anvil, Boettcher and Yellow Top Angus, High Country Heifers and Genex.

Left: Ellingson Roughrider 6283, a Roughrider son that sold to Diede Ranch for \$15,000 last year.

Dam's Nursing Ratio: 2/106 \$W: +76.36 \$B: +133.28

Lot 1 is a definite A.I. stud prospect, possessing one of the stoutest phenotypes of any bull in the offering along with a stellar set of numbers and a performance track record of success. His pedigree is rich in functional potency, combining Roughrider, Advance and the Madame Pride cow family. His granddam is the \$42,000-valued donor dam of the \$30,000 Select Sires roster member, Ellingson Secretary 2011. This bull's pedigree is filled with the traits that have kept our family in business for generations. They are paired with an astounding set of EPDs that can rival almost any bull in the breed today. He came off his dam at 980 pounds and earned a weaning ratio of 117. He will be a one-generational changer for stoutness, expression, center body mass and structural integrity. Don't miss this opportunity to own one of the great herdbull prospects to sell anywhere in 2018!

Dam's Nursing Ratio: 7/103 \$W: +64.70 \$B: +119.54

Frontiersman is one of the greatest genetic accomplishments in the history of Ellingson Angus. He combines the structural, phenotypic and genotypic components we strive for. He commands attention, flashing extraordinary body capacity and stoutness with EPD and genomic statistics to match. He weaned among the top five natural-born calves this year, coming off his dam at 1,040 pounds to earn a nursing ratio of 116. He is a serious A.I. stud candidate, offering just what the breed is looking for. His dam is in our donor pen and is regarded by many as the best Final Answer daughter they've seen. She is a model Angus female with impeccable foot and udder quality. She has an impressive production birth ratio of 7/97, a nursing ratio of 7/103, a yearling ratio of 4/103, an IMF ratio of 3/104 and a ribeye ratio of 3/103. Frontiersman's maternal brother, Ellingson Drover 6034, was Lot 1 in last year's sale, selling to Boettcher Angus, Henderson Farms and Universal Semen Sales for \$21,000. His maternal sister produced Ellingson Consistent 6235, the \$23,000 selection of Richard Angus and Arntzen Angus last year.

Dam's Nursing Ratio: 3/104 \$W: +63.63 \$B: +123.09

Lot 4 is a scale-pounder through and through, which should gain him an appreciation from cattle producers who sell their calves by the pound. He is thick topped, big middled and stands down on tremendous circumference of bone – characteristics of true performance bulls that sire market-topping feeder calves. He came off his dam and walked across the scale at 940 pounds to earn an impressive weaning ratio of 110. His genomic and performance record have validated him as a must own. A maternal sister was selected by Spring Grove Ranch from Appomattox, Va., in 2017.

Dam's Nursing Ratio: 4/105 \$W: +71.80 \$B: +125.82

Lot 5 is a combination of Roughrider and the legendary Lucy cow family. The Lucy family is responsible for producing Territory, whose influence is felt stronger than any sire utilized at Ellingson Angus in the past 15 years. Lot 5 achieves breed-leading performance in an ideal-sized package, outstanding volume and softness. He weaned off his dam at 980 pounds and earned an impressive 114 weaning ratio. His Substance dam and Bandwagon granddam are two of the most functional females on the ranch. They both have superior udder attachments and teat size and placement, which will contribute to their longevity. His outstanding granddam has earned the Pathfinder distinction with a production birth ratio of 6/96, a weaning ratio of 6/104, a yearling ratio of 5/102 and an IMF ratio of 2/106.

Astute cattlemen and cattlemen will be sure to find this rugged meat wagon on sale day. Roughrider 7233 is one of our personal favorites in the sale offering. He satisfies a balanced approach, excelling in every trait economically relevant to real-world producers. His dam has earned her place here, weaning a standout last year as well as Lot 13, which weaned at 915 pounds and earned a 104 weaning ratio. She is a long-sided, deep-ribbed cow with tremendous foot and udder soundness. He combines the best of the sires in his lineage – Roughrider, Substance, Bandwagon and EXT 473. A maternal brother is working for Steve and Sal Roseland in South Dakota, while a maternal sister is working here in our herd.

Roughrider 7097 is an extremely wide-based, capacious individual that proudly leads off a strong set of flush brothers. He exemplifies what we strive for in producing cattle that possess an ideal growth curve for extreme performance through yearling time, yet moderate into reasonably sized mature animals. Much like his sire, this bull will be a one-generational changer for depth of body, muscle shape and structural composition. 7097 is a maternal brother to the popular Semex sire, Ellingson Top Shelf 5050, one of the top-selling bulls at \$50,000 in our 2016 sale. You'll want to keep every daughter out of this bull, as they are sure to be the kind to thrive in forage-based environments.

7158 will be appreciated by cattle ranchers who are looking to inject extra substance of bone, stifle and payweight into their calfcrop. He is a member of a trio of flush brothers that are maternal brothers to the \$50,000 Ellingson Top Shelf 5050 at Semex Beef. Top Shelf was the top ribeye bull of his calfcrop, scanning a 19.5-inch ribeye at 12 months of age. His recently deceased Pathfinder dam has been an integral part of our embryo transplant program. She posted a production birth ratio of 6/100, a weaning ratio of 6/105, a yearling ratio of 3/103 and a ribeye ratio of 3/112. A 7/8 brother was selected by Maher Ranch for \$16,000 in 2014. Four maternal sisters have been retained in the Ellingson Angus cowherd, and the one that is eligible has earned Pathfinder status.

Lot 18, Ellingson Roughrider 7428.

Here is a wide-tracking, heavy-structured Roughrider son that is a little younger, but that is sure hard to tell as he holds his own against even the oldest ones. He has been no slouch for performance either, earning a 962-pound 205-day weight and a weaning ratio of 119 and posting outstanding gains on test. His dam has defied the odds of Father Time, entering her 11th year of production with no signs of slowing down. She is a big-barreled brood cow with impeccable foot and leg structure. The Pathfinder dam has a production nursing ratio of 9/107, a yearling ratio of 5/104 and an IMF ratio of 4/109. Cody and Amber Staiger, Talkington Angus and Sumption Farms purchased maternal brothers. Three maternal sisters are working dams in our herd today.

Dam's Nursing Ratio: 5/107 \$W: +61.39 \$B: +128.83

Roughrider 7118 will be popular amongst the cowboys. He is a heavy-structured bull that stands down on a big, functional foot and displays outstanding muscle shape and masculinity. He commanded a 109 weaning ratio after he came off his dam at 980 pounds. He has the potential to inject extra payweight into his feeder calves and base width into his daughters. His Final Answer dam is a Pathfinder female that has a production birth ratio of 5/100, a weaning ratio of 5/107, a yearling ratio of 4/107 and a ribeye ratio of 3/110. She has stuck to first-service A.I. every single year. His maternal brother, Ellingson Blackstar 4165, was the \$25,000 selection of Alta Genetics in 2015 and now ranks as one of the top growth and ribeye sires of the entire Angus breed. Another maternal brother is working for David Biegler in South Dakota.

Here is an intriguing mating from one of the foundation dams of our program. Roughrider 7135 weaned off his dam at 930 pounds to earn a 107 weaning ratio. His dam is a phenotypic and production standout, offering tremendous power, mass and structural integrity. She has a production birth ratio of 7/100, a weaning ratio of 7/103, a yearling ratio of 6/109, an IMF ratio of 4/124 and a ribeye ratio of 4/102. Maternal brothers are working for Cody and Amber Staiger and Jon and Julie DeKrey. He is also a maternal brother to Ellingson Bandwagon 1053, a bull that was selected by Semex for \$23,000 in 2012 and has went on to sire some of the great females in our herd.

Here is a soggy-middled Roughrider-Substance combination that weaned at 930 pounds and tallied an impressive 104 weaning ratio. His dam and granddam are powerhouse females that have turned many heads, not just for their impressive looks, but for their production as well. His dam is a maternal sister to Ellingson Bandwagon 1053, a bull that was selected by Semex for \$23,000 in 2012 and that has had great success in siring productive brood cows. She is the dam of the high-indexing ribeye bull in last year's offering. The maternal brother scanned a 19.6-inch ribeye to place his name in the records books at Ellingson Angus. Kevin Uran purchased the bull for \$9,500.

Congratulations to long-time customers Julie and Jon DeKrey, who were named the North Dakota Angus Association's Commercial Breeder of the Year at the organization's annual banquet.

Lot 21 is an expansive-middled individual that is long sided and clean fronted. He combines Roughrider, Bandwagon, Substance, Tradition, Bando 5175, Executive 727 and Rito 2100 in his functional pedigree. He came off his dam at 930 pounds to earn a 107 weaning ratio. He will be a good fit for commercial cattle ranchers who want to maximize performance without sacrificing doability or maternal superiority. His dam is an angular, full-bodied female with super foot and udder structure. She has a production birth ratio of 4/97, a weaning ratio of 4/104, a yearling ratio of 2/103 and a ribeye ratio of 2/103. Maternal brothers have found homes with McPherson Angus Ranch, Bob Vondrak and Kyle Bruski.

This bull is double-bred performance, combining Roughrider and Gridiron. His dam is a model Angus cow with a picture-perfect udder. Jim Schwartzbauer, Dallas Schott, Beefer Creek Ranch and Clifford Johnson own maternal brothers.

EA Blackclass 6821,
Lot 32's maternal
granddam.

Ellingson Identity 9104,
the maternal grandsire
of Lots 31-34.

Reference Sire: *Powerpoint*

Powerpoint is gaining worldwide attention as one of the elite young calving-ease and maternal sires available in the A.I. industry today.

He was selected as a standout amongst his contemporaries for his growth figures, carcass traits and eye-appealing phenotype. We were also thrilled by his dam and granddam.

You will appreciate his sons' outstanding width, rib shape and muscle expression and the tremendous amount of substance and heel depth they stand down on.

Select from the Powerpoint sons for their outcross ancestry and curve-bending EPDs.

We own him with Spickler Ranch North and ST Genetics.

Dam's Nursing Ratio: 1/110 \$W: +60.66 \$B: +110.58

Pinpoint has definite herdbull potential, having the credentials to be utilized in any progressive commercial or registered herd. His maternally driven pedigree is focused around the essential traits that form the strength of a cowherd. He is an outcross to many of today's lines, combining Powerpoint, Format and Max 602C. Pinpoint will grab your attention with his balanced phenotype. He is clean fronted, smooth profiling and soggy middled and displays excellent shape and width in his stifle and at his base. Most importantly, he should be considered a foot improver, offering tremendous heel depth and a round foot shape. His young dam is an embryo transplant daughter of the \$42,000 Ellingson Format 2205, one of the most potent maternal and marbling sires ever utilized here. She is feminine and full bodied and has a picture-perfect udder and outstanding athleticism when she travels. Pinpoint bent the curve, earning a birth ratio of 93 and then hitting 900 pounds coming off his dam with a 110 weaning ratio. He ranks in the top 10 percent of the breed in a whole plethora of traits, which should make him a viable option in a wide array of matings. This is no doubt one of the top calving-ease sires that will sell anywhere in 2018.

Professional is the first of a trio of impressive full brothers in blood whose granddam has had a tremendous influence on our program, with nearly 30 daughters retained in our herd. His dam is one of seven flush sisters that were visitor favorites throughout the summer, as they are soft middled and angular with impeccable foot and udder structure and big calves alongside them. This bull is a true professional when it comes to bending the curve, starting off at 76 pounds at birth and then weaning off his 2-year-old dam at 980 pounds and a 117 weaning ratio. He ranks near the top of the charts in every category important to Angus enthusiasts. His impressive figures go along with a stunning phenotype, including extra skeletal extension, width, muscle expression, spring of rib and softness. His overall presence and natural athleticism on the move will catch the attention of even the most astute cattle producers on sale day. His outcross pedigree, combining Powerpoint, Earnan and Max 602C, offers excellent mating flexibility for most popular lines of today. His dam is a maternal sister to Ellingson Versatile, the \$50,000 selection of Talkington Angus and ST Genetics in 2016. Another maternal brother to his dam is Ellingson Revolution 1047, the \$45,000 selection of Albrecht Angus and Carstens Farms Limited in 2012. The proof of success of his cow family has already been etched into the record books. Ellingson Professional 7041 has the genetic merit to add another page.

Dam's Nursing Ratio: 1/113 \$W: +60.83 \$B: +105.89

Presentation is a square-made individual that offers tremendous natural thickness and center mass. He was able to bend the curve, yet still maintain an ideal skeletal frame score. He started at 69 pounds, then weaned off his 2-year-old dam at 935 pounds to earn a 113 weaning ratio. He should be a superior breeding piece to produce females that you can build a program around. His young dam comes from a whole clan of full sisters that will have their presence known for years to come. His dam is one of our personal favorites, especially considering her balance, depth of flank, base width and structural soundness. She is a maternal sister to the \$50,000 Ellingson Versatile at ST Genetics and Talkington Angus, the \$18,000 Ellingson Real Business 5168 at Alta Genetics and Carstens Farms Limited and the \$45,000 Ellingson Revolution 1047 at Carstens Farms and Albrecht Angus. Make sure to analyze this super wide-topped herdsire prospect on sale day.

Dam's Nursing Ratio: 3/107 \$W: +69.43 \$B: +166.66

Practical 7038 showcases phenotypic and genotypic merit and an outcross lineage. He is a larger designed bull that stands on extra substance of bone and a big foot. He displays extra shape down his top, through his stifle and into his base. He ranks near the top of the breed in every economic-driving trait for real-world ranchers. He has the ability to be used on heifers. He earned a birth ratio of 93, yet came off his dam at 970 pounds to earn an impressive 107 weaning ratio. His outstanding dam is the best Upward we have ever seen. She is a powerhouse female that has gained admittance into our donor pen as a consistent and potent breeding female. You will appreciate the way she carries herself on the move, her super heel depth and foot quality and her powerful look from whichever angle she's viewed. She has a production birth ratio of 3/94, a weaning ratio of 3/107 and a yearling ratio of 2/112. Eight daughters have been retained in our herd.

Here is another outstanding individual from the first calfcrop of Powerpoint, the ST Genetics sire. Many visitors have ranked him high on their list as they have appraised the bulls through every stage of development. Like his full brother, he defies the odds, being both an EPD curvebender and a phenotypical dream. He offers a very stout, wide-based and functional package. His donor dam is one of the strongest phenotypic and genotypic females in our entire operation and will have a strong influence on our breeding program going forward. Her influence is strongly felt in this offering, having featured progeny in three different sire groups. A maternal brother was a feature Final Answer son in last year's offering, selling to Smith Farms, LLC., in Iowa. One of his maternal sisters weaned one of the highest indexing bulls in our 2017 calfcrop. He posted a 117 weaning ratio.

Dam's Nursing Ratio: 1/111 \$W: +66.69 \$B: +141.78

Lot 44 should attract lots of attention, combining the best of his popular sire, proven maternal grandsire and potent cow family. He is extremely square made with lots of guts, mass and girth. He was 66 pounds at birth with an 88 birth ratio. Still, he came off his dam at 915 pounds with a 111 weaning ratio. His dam is one of the top Resource daughters anywhere, having what it takes from a phenotypic and genotypic standpoint to be a future donor dam. Her Tradition dam was a top producer in our program and is now working at Rooker Angus in Pennsylvania. She is the mother of Final Answer 8803, our 2009 top-selling bull to Katus Ranch, where he is still being used in large commercial heifer A.I. projects. This bull offers as strong of EPDs as you will find, ranking in the top 1 percent for calving ease direct, the top 4 percent for birthweight, the top 5 percent for weaning weight, the top 3 percent for yearling weight, the top 20 percent for marbling, the top 10 percent for \$W and the top 4 percent for \$F.

Powerpoint 7466 is a thick-topped bull that portrays a balanced look with style and class. He is three generations deep with sires proven for maternal calving ease in Powerpoint, Boardwalk and Bushwacker. Out of a first-calf heifer, he combines the Emblynette, Madame Pride and Queen Essa lines for a pedigree stacked with maternal superiority. Use this bull on virgin heifers to inject calf vigor and maternal calving ease and to yield a dominant set of brood cows that will be a mainstay for many years to come.

Eric (left) and Sam Knapp analyze the offering in the 2017 production sale.

Reference Sire: *Remedy*

Remedy is gaining worldwide attention after siring a record-selling group of sons in last year's offering. He is an outlier to any other curve-bending bull in the Angus breed today. He offers sleep-all-night calving ease and scale-pounding performance. Atypical of most curve-benders, he injects loads of muscle mass and natural thickness.

Remedy is an improver of foot quality and structure, along with other traits economically relevant to commercial cattle ranchers.

His first daughters are impressive females with picture-perfect udders and a feminine, brood-cow look.

Remedy is owned with the 1T01 Group in Tennessee and leased to Select Sires.

Left: Ellingson Homestead 6030, the \$130,000 top-selling bull and Remedy son in our 2017 sale.

Homebound has the look of an all-around herdsire. No matter who you are, you will surely appreciate everything about this bull. He is a phenotypic and genotypic standout. He offers a curve-bending set of figures with a breed-leading ribeye EPD and strong dollar values. He has as much true muscle shape and natural thickness as you will find in a zero-birthweight bull. He is structurally flawless and moves with true athletic ability. He combines the best of his sire and maternal grand-sire. His dam ranks as one of our best Resource daughters and weans a high percentage of her body weight. She is deep flanked, wide based and long fronted with lots of center rib and more femininity than the typical Resource daughter. Her solid udder structure and teat placement are what we work to replicate. The females before her are all model Angus dams that always maintain a high body condition score. Homebound ranks right with his lead-off paternal brothers that sold in last year's sale and are now some of the hottest young sires in the breed.

Hometown is an impressive continuation of the Remedy sons that were the lead-off bulls in last year's sale and that have now become two of the heaviest used young sires in the breed. Hometown offers the same phenotypic and genetic merit that made his paternal brothers so popular along with an intriguing outcross pedigree. Hometown combines Remedy, Advance, Territory, Traveler 004, EXT 6106 and Bushwacker for a background filled with Pathfinders and breed icons. He was one of the top performers of his calfcrop, earning a 96 birth ratio and still weaning off at 955 pounds with a 116 weaning ratio. His Advance-Territory 2-year-old dam is a feminine, boldly-sprung female with awesome foot and udder structure. She is setting a standard of nothing but the best for fertility, sticking to first-service A.I. again this spring. Maternal brothers to his dam are working for Lagge Farms and Simon Jacobs.

Here is a Remedy son that is double-bred to the popular Connealy Thunder, who has left a maternal legacy and is a foot-quality extraordinaire. He is a sleep-all-night heifer bull with extra muscle shape and expression. This bull's dam was one of the most functional bred heifers that we calved last spring and is one of our personal favorites. She is sound structured with phenomenal udder quality and fleshing ability, all put together in an eye-appealing package that never disappoints. He reigns from the Primrose cow family whose members are gaining international attention for their stunning phenotypes and production records. His Bandwagon granddam is a wide-tracking, deep-ribbed individual that is serving as a foundation donor in the Rooker Angus program in Pennsylvania. This bull has the mechanics to be a long-lasting sire in any program.

Dam's Nursing Ratio: 3/106 \$W: +71.83 \$B: +174.91

This performance standout will inject size, substance and pounds into his progeny. His calves should be the high-weight-per-day-of-age kind, both on the cow and in the feedyard. He offers an above-average frame score, tremendous length from front to rear and a wide diameter of bone and covers a wide track. He weaned at 955 pounds to earn a 112 weaning ratio and a phenomenal 118 yearling ratio. His dam is member of a whole tribe of sisters that continue to carry on the legacy of the timeless Blackclass 124 female, the most influential female ever to walk at Ellingson Angus. She is a maternal sister to the \$50,000 Ellingson Versatile, the \$45,000 Ellingson Revolution 1047 and the \$18,000 Ellingson Real Business 5168. **This is a fall-born bull.**

Dam's Nursing Ratio: 2/101 \$W: +47.50 \$B: +129.51

Remedy 6445 is one of the highest growth options of this sire group and the entire offering. He has the genetic makeup and performance track record to push your program's upper limits to new heights, translating into more pounds of beef to market each fall. His dam never fails to wean one of the biggest calves out of the fall-calving herd and is certainly on track to repeat that again this year. He earned a commanding 108 weaning ratio last spring when he was weaned. A maternal brother is working in the Jim Petik and Sons cowherd in South Dakota, while a maternal sister is a foundation female for Triple Son Farms in Texas. **This is a fall-born bull.**

Many will pick this performance specialist out. His phenotypic makeup and genotypic figures have helped position him as one of the most dominant individuals of his calfcrop. He offers extra skeletal size and extension, a big foot and extra circumference of bone and displays more muscle expression than most in the breed. He earned a 110 weaning ratio and a 113 yearling ratio. His dam is a powerhouse that recently joined our donor team. She combines structural soundness, eye appeal and productivity into an impressive package. Her dam is a maternal sister to a standout donor, EA Primrose 9155, that produced the \$21,000 Ellingson Drover 6034 and Ellingson Frontiersman 7132. Frontiersman sells as Lot 2 in this sale. **This is a fall-born bull.**

Cowboy Answer will be one of the absolute standout Cowboy Up sons to sell anywhere this spring. This bull has all the properties of a distinguished performance sire and has the power and stoutness we deem necessary to be utilized in our program. He is a replication of his popular sire, possessing the same eye appeal and function that we see in Cowboy Up. Lot 66 weaned off his dam at 1,035 pounds to earn a 122 weaning ratio. His performance proof against a competitive set of contemporaries and strong genomic tallies have made him one of the top-ranking non-parent sires of the breed for growth figures and dollar values. His Pathfinder dam has nothing short of an astounding production record and a front-pasture donor dam phenotype to pair it with. She is a top income-earner, having produced the \$32,500 Ellingson Stetson that sold to Alta Genetics in 2015 and has been utilized here. She has a production birth ratio of 5/99, a nursing ratio of 5/110, a yearling ratio of 2/110, an IMF ratio of 1/134 and a ribeye ratio of 1/105. Other maternal brothers are working for Larry Thompson and Robert Burns.

Lot 66, Ellingson Cowboy Answer 7357.

Ellingson Stetson, Lot 66's maternal brother.

Lot 67, Ellingson Cowboy Way 7198.

Cowboy Way is a big-time growth herdsire prospect that offers an outcross lineage. Cowboy Way will inject extra size, pounds and mass into his progeny. He is the kind of bull that will make tremendous genetic improvement within just one generation. He ranked in the top 10 of his calcrop for weaning weight as he pounded down the scales this fall at 1,010 pounds to earn to a 119 weaning ratio. He has proven his performance potential through his genomic rankings, his EPDs and, most importantly, his actual growth resume. His Tradition dam reigns from the legendary Evergreen cow family. She has a production weaning ratio of 2/113 and has stuck to first-service A.I. every year of her career. His maternal sister by Boardwalk is a standout in our bred heifer pen and looks to have a bright future here.

Dam's Nursing Ratio: 4/104 \$W: +77.47 \$B: +126.98

When you see this bull, you will realize why he carries the name he proudly has. In simple terms, he is a meat wagon, offering the guts and stoutness we believe are vital in all breeding sires. To achieve the amount of extreme performance that he has in the ideal frame package he offers is rare. He weaned off at an astounding 1,010 pounds to earn a 115 weaning ratio. Along with his actual data, he scored well on his genomics and has an impressive set of numbers. His dam is one of our personal favorites and is declared by many as the best Substance daughter they have ever seen. Rance Long considers her as one of the top few females of the entire cowherd. She carries a feminine look with an especially stylish front end and is square from each corner of her skeleton. She is still extremely soft middled and has the foot and udder quality that Angus enthusiasts would immediately appreciate. Her production record speaks for itself, as she boasts a nursing ratio of 4/104 and has stuck to first-cycle A.I. service every single year. His Territory granddam is a maternal sister to the Pathfinder granddam of the \$41,000 Ellingson Homegrown 6035. Maternal brothers are working for Terry Wilkens of New Salem and Lagge Farms of Garrison. He has the credentials and eye appeal to be selected for use beyond the breeding pasture.

Ellingson Traction 6305, Lot 68's maternal brother.

EA Blanche 1137, a maternal sister to Lot 68's granddam.

Ellingson Homegrown 6035, produced from the same lineage as Lot 68.

This is an intriguing mating, combining the best performance of Cowboy Up and Earnan with the Lucy cow family, which is responsible for producing Territory, the sire many have proclaimed as one of the greatest breeding achievements to produce real-world cattle. Cowboy Class is a standout performance bull. That's confirmed by his 117 weaning ratio and a set of genomic rankings that place him at the top of the breed for weaning, yearling and carcass weight. A full brother to his dam was a performance standout in his calf-crop and was selected by Steve and Sal Roseland.

Lot 70, Ellingson Cowboy Class 7243.

Lot 71, Ellingson Cowboy Up 7160.

Left: Ellingson Ribeye 3195, the \$67,500 top-selling bull in 2014 and Chaps' maternal brother, owned with Brenner Angus and Select Sires Beef.

Chaps is soaring in popularity as Resource's most widely used son. He has a real herdsire look, offering extra width, depth of body and a structurally sound package.

His progeny offer the same muscle shape and rib as the Resources, although we expect his daughters to be even better.

His Pathfinder dam recently joined our donor pen. She is a functional, angular and full-bodied female with a super udder and feet.

Chaps is owned with Trowbridge Angus, Boyd Beef Cattle, Williams Angus and ABS Global.

Cheyenne 7128 is what most will call the "cowboy's kind." He displays tremendous stoutness, volume and mass in a sound and smooth-blending package, which will allow for many service years. It is only so often you can find so much explosive performance in an ideal package like he offers. He came off his 2-year-old dam at 920 pounds and with a 111 weaning ratio. His Upward dam is a modest-sized female that will play an influential role in our program moving forward. She weaned probably as high of a percentage of her body weight as any female on the ranch this past fall. She is an embryo transplant daughter of the long-time donor EA Emblynette 434, the \$35,000-valued female that was owned in conjunction with Kiamichi-Link Ranch in Oklahoma. His granddam is considered to be one of the foundation dams of our entire program and is partially responsible for making the Emblynette family the most populous of any cow line on the ranch today.

Lot 73, Ellingson Cheyenne 7128.

EA Emblynette 434, Lot 73's granddam.

Ellingson Ultimate 2104, a full brother to Lot 73's dam.

Chinks is a prime example of why so many Angus breeders have decided to utilize Chaps in their programs. He is a deep-flanked, wide-based and functional herdbull prospect that has the outcross lineage to be utilized in almost any outfit. He represents three generations of Ellingson-bred sires in Chaps, Format and Identity. His 2-year-old dam is a boldly sprung daughter of the \$42,000 Ellingson Format 2205 who has proven himself as a maternal sensation. His perfect-uddered dam is one of the top females from her calf crop and more than met our expectations for production, weaning Chinks off at 995 pounds to earn an astounding 120 weaning ratio. He is a big-testicled bull that offers an extremely balanced EPD package.

Authorize is one of our favorites in the offering. He is proof that a stellar phenotype, breed-leading figures and a strong maternal tradition can be achieved in one potent package. He is a wide-tracking, big-topped and bold-middled bull that moves like a cat. He started life at 77 pounds and came off his dam at 955 pounds, earning a 109 weaning ratio. Not only did he post strong digits on his actual data, but he did extremely well on his genomic rankings as well. His Identity dam was hands-down one of our favorite 2-year-old females last spring. She is a model Angus cow that catches your eye every time you drive through the pasture. She is the kind of female that you would be hard pressed to find a flaw in, which doesn't come as a surprise, since her Territory dam is one of the very best cows on the ranch for looks and production. His dam is a maternal sister to the \$14,000 Ellingson Sagebrush 6234 that is working in the Lazy JB Angus herd in Colorado. His granddam is also a maternal sister to the dam of Ellingson Top Shelf 5050, the \$50,000 Semex sire. We believe Authorize is the long-awaited replacement for his sire. He will restore the convenience traits in a cowherd without sacrificing breed-leading performance traits or dollar indexes. Make sure to look this docility extraordinaire up on sale day. Bulls like this are rare treasures.

Dam's Nursing Ratio: 1/113 \$W: +74.91 \$B: +118.45

Here is a high-performance Advance son that should be utilized on mature cows to inject extra payweight into his feeder calves and to sire functional brood females like his sire has done in dominant fashion here. This bull came off his 2-year-old dam at an impressive 935 pounds to earn a 113 weaning ratio. His dam is a broody daughter of a \$40,000 Genex sire, Ellingson Plateau 1155. She has excellent foot quality, an ideal fore udder attachment and perfect teat size. She has a bright future ahead of her, as she has again stuck to first-service A.I. for her calf this spring. She is the type to wean a high percentage of her body weight each year without sacrificing doability. For those who have waited to select an Advance son with extra performance and skeletal size, here is your chance.

Just like with raising a child, it takes a village to host a production sale!
Thanks a million to all the family, friends and service providers
who help us make this happen year after year.

Dam's Nursing Ratio: 4/104 \$W: +71.22 \$B: +120.03

Advance 7739 is a longer-aged embryo transplant bull out of the \$36,000-valued EA Emblynnette 9184, the dam of the \$42,000 Ellingson Format 2205 now at Alta Genetics. This bull is deep flanked and boldly sprung, ensuring his ability to sire functional brood cows that can thrive under real-world conditions. Other maternal brothers are working for Cody and Amber Staiger, Benny Bachand and Eric Knapp. **This is a long-age bull.**

EA Madame Pride 3295, produced from a maternal sister to the dam of Lots 93-95.

Here is one of the top-gaining bulls on test in the entire offering. He should be utilized on mature females to add payweight and profitability. Even though he is one of the youngest bulls in the sale, it is sure hard to tell when you analyze him amongst his peers. His dam is one of the best Earnan daughters and young females in our herd. She has a front-pasture phenotype with added length and skeletal size and tremendous power and mass. She is feminine fronted and structurally sound. She has a production nursing ratio of 3/104 and a yearling ratio of 2/105. Maternal brothers are working for Brady Ham and Jack Waltman.

Advance 7609 offers the most skeletal extension and performance of his flush. Paired with his extra size and scale are added muscle shape and base width. He leads off a flush of bulls from one of the highest performance females in our cowherd. Many of his half and full sisters have been retained in our replacement pen and look to be strong factors of production moving forward for us.

EA Madame Pride 8928, a maternal sister to the dam of Lots 93-95.

Left: Koupal Advance 28,
a son of Koupal Juneau 797.

Juneau 797 carries on the timeless tradition of the Juneau line that has set the standard for maternal genetics. He is a proven sire, having nearly 1,000 progeny in the breed database.

Commercial cattle producers will appreciate the added size, length and pounds his sons offer. He has sired progeny similar to that of the Plateau and Earnan cattle.

Reports on his daughters have been nothing but positive. They are responsible for producing many high-indexing calves, which has earned him Pathfinder status.

His strong EPD profile and high accuracy figures are a testament to his genetic merit and predictability.

This is a rare opportunity to purchase a maternal brother to Ellingson Roughrider 4202, the popular Genex A.I. sire, out of the timeless genetics from the Juneau line. Ellingson 797 Juneau 7121 was mated to be a successful breeding machine to perpetuate maternal convenience traits and eye appeal in his females. He is the kind of individual that is hard to fault – athletic on the move and offering an extremely square-made package with extra softness through his center portion. He came off his recipient dam at an impressive 945 pounds. Maternal brothers are working for the Diede Ranch of Richardton; Eric and Sam Knapp of Bloomfield, Iowa; Jay and Salena Gullickson of Cannon Ball; and Todd Boettcher of Spencer, Neb. Eleven maternal sisters have been retained in our own cowherd.

Dam's Nursing Ratio: 5/101 \$W: +53.64 \$B: +110.99

Juneau 7055 is a large-outlined, high-growth bull that ought to inject scale and gainability into his calves. Both his sire Juneau 797 and maternal grandsire Sitz Dimension 8607 have created reputations for siring highly profitable feeder cattle. His dam comes from a three-generational line of females before her that earned the distinguished Pathfinder status. His maternal brother was a featured Resource son in last year's sale, selling for \$9,000 to Clair and Sue Gullickson of Solen. Another maternal brother is working for Denny Christian in South Dakota. His maternal sister produced the second high-selling heifer in last year's sale, selling to Ingram Angus in Tennessee for \$18,000 and having what it takes to be in their donor pen one day.

Clair (left) and Cole Gullickson study the offering ahead of a previous sale. The Gullickson family bought a maternal brother to Lot 113 by Resource last year.

Dam's Nursing Ratio: 4/103 \$W: +59.38 \$B: +132.57

Here is the result of a successful mating between 797 and Blackcap Revolution. He weaned at 955 pounds and earned a 106 weaning ratio. He would be an excellent addition to any program that aims to bring heavy calves to the sale barn each fall. His dam is a square-made, massive-middled and sound female that is also stylish fronted and smooth blending throughout her profile. A maternal brother was a standout in the 2014 calfcrop and was selected by Rhein Valley Farms for \$10,000. A maternal sister by Remedy was a featured female last year. She was selected by NLC Simmental Ranch.

Juneau 7075 is a standout performance individual amongst the entire 2017 calfcrop. He has it in his blood to grow, combining Juneau 797, Blackcap Revolution and the powerful Hyalite Lady cow family. 7075 weaned off his big-barreled dam at 1,045 pounds and earned a 116 weaning ratio. He will inject extra size, scale and mass into his feeder calves. Be warned: you might have to order another cattle pot for your 2019 calfcrop when you utilize a bull like this!

Dam's Nursing Ratio: 4/106 \$W: +60.77 \$B: +125.79

Here is a stout, big-stifled bull that offers an almost complete outcross pedigree. He combines the scale-pounding performance of Juneau 797 and Blackcap Revolution in a two-generation interval. He had a 925-pound 205-day weight and earned a 104 weaning ratio. His dam has a production weaning ratio of 4/106 and an average calving interval of 361 days on four calves. Moreover, she has stuck to first-cycle A.I. service every year. His Pathfinder granddam was an own daughter of Cincha and defined the term longevity here for many years. A maternal sister was a picture heifer in last year's sale and one of the high-indexing individuals of her calfcrop. She sold to Fisher Angus of Oklahoma for \$7,500. Another maternal sister resides as a brood cow here, where she has recorded a nursing ratio of 2/105.

Just like E.M. Tiffany, we believe in the future of agriculture, because of young people like these. This photo was taken at the 2017 Mandan FFA Chapter Banquet. Stetson served as the North Dakota State FFA Vice President last year. Jameson was chapter vice president, and Sierra chapter secretary.

Transcend is one of the widest tracking and thickest topped bulls ever produced at Ellingson Angus. He was the highest growth and ribeye bull of his calfcrop, all in realistic frame score. He has the ability to add unmatched muscle shape, capacity, pounds and foot quality.

His Pathfinder dam is on the Ingram Angus donor roster and has two sons being utilized at Ellingson Angus. His granddam, also a donor, is the mother of many high-selling cattle.

He has one of the strongest EPD profiles of any Resource son. His outcross genetics and strong maternal heritage make him a must-use sire.

We own him with Spickler Ranch North.

Left: Ellingson Regiment 6362, Transcend's \$16,000 maternal brother owned with Ressler Angus.

Lot 125 is a great way to kick off the first calfcrop of the Transcend sire group and one of our favorite bulls in the offering. He has a distinct herdbull look and is difficult to find any holes in. He is thick, strong topped and expressive in his muscle pattern and travels with ease. He weaned off his dam at 1,030 pounds and recorded a 118 weaning ratio. His dam hails from the Emblynette cow family and is a direct daughter of the \$35,000-valued EA Emblynette 434, the dam of many top young females at Ellingson Angus today. Emblynette 2159 sets the bar for production, as she has recorded a birth ratio of 3/100, a nursing ratio of 3/107, a yearling ratio of 1/102, an IMF ratio of 2/117 and a ribeye ratio of 2/114 and has an average calving interval of 360 days. She also had a set of twin heifer calves that can't be included in her average nursing ratio, but were 108 and 112 at weaning. Coming as no surprise, Lot 125's dam's full sister produced the lead-off bull in the Chaps division this year. Three of his maternal sisters have been retained in our cowherd. Two are standout Chaps females in our bred heifer pen. A maternal brother was selected by John Kost in 2015.

Lot 125, Ellingson Transcend 7267.

To say Transcend 7393 is a meat wagon is an understatement. He is a huge-middled, wide-based, pounds-heavy bull. To put it simply, he is a near replication of his \$28,000 sire. He weaned off his dam at 945 pounds to earn a weaning ratio of 115. His Territory dam is angular, full bodied and structurally flawless. She is a maternal sister to the \$42,000-valued EA Madame Pride 0040, a member of our donor roster and the dam of Ellingson Secretary 2011, the \$30,000 Select Sires bull. The Secretary daughters are some of the easiest keeping females on the ranch. Use this bull to make an immediate impact of added payweight and gainability in your feeder calves and doability in your replacement females.

Transcend 7155 is a rugged-made growth prospect that greatly resembles his \$28,000 sire. A maternal brother to his dam was selected by David Boas for \$15,000 in 2015. Another brother was selected by John Lord for \$9,750 in 2016.

These two sharp-dressed cowboys, Colby Diede (left) and Blu Wanner, were among the sale guests last year.

Thanks, Sancho & Seb Jacobs!

One of the greatest blessings we have at Ellingson Angus is a dedicated crew. They are not only invaluable team members, but part of our family.

Brothers Sancho and Sebastian "Seb" Jacobs share in our dream to raise high-quality cattle and to leave the land in a little better shape each day. They both have a fantastic work ethic, a can-do attitude, an upbeat, positive nature and a strong Christian faith. They help make the world go round at Ellingson Angus day in and day out. Sebastian has been with us for more than eight years, and Sancho for two.

We are grateful for all they do and hope you have a chance to meet them on sale day.

Left: Sancho Jacobs. Right: Sebastian Jacobs.

Ellingson Resource 7636 is a replica of his popular sire. He has an authentic Angus herdbull look with outstanding muscle shape, base width, rib capacity and function. He is a performance specialist in a real-world frame score. You will notice the strong EPD profile he boasts, especially for weaning weight, yearling weight, scrotal, carcass weight, ribeye and the dollar values. He is one of a set of outstanding embryo brothers whose dam is structurally superior.

Lot 132, Ellingson Resource 7636.

It is always fun to see these next-generation beef producers in the crowd.

EA Bells Girl 2181, the dam of Lots 132 and 133.

Dam's Nursing Ratio: 7/100 \$W: +60.93 \$B: +110.62

Here is the lead-off bull of a powerful flush of Resource sons that will perpetuate the muscle shape and performance their sire does. He came off his recipient dam at 970 pounds. He combines the Emblynette and Blackcap May cow families. His stout 004 mother had outstanding foot and udder quality and was a mainstay here until she was 12. His maternal sister has been a top producer for us too, earning a nursing ratio of 9/105. She is the dam of Ellingson Reservoir 4099 that was selected by Amstutz Cattle Company for \$18,000.

Resource 7036 is a well-balanced, stout-made bull with rugged herdsire appeal. His 10-year-old dam is a granddaughter of Traveler 004 and has consistently produced in the top tier at our ranch, recording a nursing ratio of 8/102. He results from a mating that has a track record of success. A full sister was a standout in last year's sale, selling to Cole Elrod of Georgia, where she is on the short list to become a donor cow. Maternal brothers are making a living for Cody and Amber Staiger, SB Horse and Cattle Ranch and Show-Me Christian Youth Home. Two maternal sisters have been retained in our breeding program.

Left: Ellingson Top Shelf 5050
as a yearling.

Top Shelf was one of the top-selling bulls in our 2016 sale, where he was recognized for his eye appeal and balance. He scanned an adjusted ribeye area of 19.5 inches as a yearling – one of the very best ever.

Like his sire, he is adding extra size and performance to his progeny, and they look to be top-gaining animals in the feedlot. He is seeing heavy use in some of the most prestigious herds in North America.

Top Shelf hails from the Emblynette cow family. His broody Pathfinder dam has exceptional foot and udder quality and is one of our donors.

We own him with Semex Beef, Hoffman Ranch and the Top Shelf Group.

Top Flight represents the freshest of genetics from our program, combining the \$50,000 Top Shelf with a 2-year-old Advance female that has started her production career off with a bang. Top Flight replicates the phenotypic qualities that has made his sire one of the heaviest used bulls produced from our program. He is a clean-fronted bull that is smooth through his shoulder and all the way through his long-bodied profile. Still, he displays extra muscle expression and shape. When you analyze him from the rear, you will appreciate how square he steps down on all four corners and the additional top and base width he exhibits. Most of all, you will be impressed with his overall balance. He is the kind of bull that can be utilized successfully on a wide variety of females. At weaning, he weighed an impressive 950 pounds and ratioed 113 amongst a stout contemporary group. His young mother embodies all the qualities we look for in a functional brood cow. She is a maternal sister to the dam of Ellingson Stagecoach 4015, the second top-selling bull in our 2015 sale, selling to Diamond J Angus and Alta Genetics for \$65,000. His Cowboy Logic grandmother has four daughters in our herd, two of which are esteemed Pathfinder dams.

Lot 145, Ellingson Top Flight 7023.

This bull has the figures to be utilized on virgin heifers with confidence and without sacrificing performance at weaning or yearling time. Much like his sire and grandsire, he has the ability to add extra size and stretch to his calves. He came off his dam at 890 pounds and with a 109 weaning ratio against some competitive contemporaries. His dam is an attractive cow from the first group of daughters we calved by Boardwalk, one of the most fault-free sires we have ever used. His dam, much like her Cowboy mother and Larks Canyon grandmother, is among the best uddered and easiest fleshing females we have ever had here.

Dam's Nursing Ratio: 3/106 \$W: +53.13 \$B: +103.27

This is the largest outlined Plateau son in the sale. He replicates his \$40,000 sire in many aspects. He earned a weaning ratio of 108 this past fall and has gained tremendously since. His dam is a granddaughter of the famous Everelda Entense 1905 female and recorded a production birth ratio of 3/98, a nursing ratio of 3/106 and an IMF ratio of 2/120. She is a model Angus female that is easy to maintain. Maternal brothers are working for Sheldon Holte and Stan Schlosser. This bull may be overlooked due to his younger age, but he is without a doubt one of the best performance-oriented herdbull prospects in the sale.

EA Blackclass 7849, a maternal sister to Lot 156's dam.

The North Dakota High School Rodeo Team competing at the National High School Finals Rodeo.

Sierra and her trusty steed, Spark, earned the opportunity to compete in the National High School Rodeo Finals in Gillette, Wyo., in mid-July in the reined cow horse event.

This is a relatively new high school rodeo event, where horses are asked to work a single cow in the arena, performing specific maneuvers that include circling and maneuvering the cow and performing a reining pattern. The horse and the rider are judged on their performance in the pattern, herd work and "fence work."

The reined cow horse event includes a reining pattern with spins and slides, as well as cow work with "boxing" and animal handling.

Reference Sire: Boardwalk

Ellingson Boardwalk 3032

SAV Final Answer 0035

EA Pride 346

Sitz Traveler 8180
SAV Emulous 8145
Sitz Alliance 6595
EA Pride 114

Many astute cattle producers have proclaimed Ellingson Boardwalk 3032 as the best son of Final Answer. His dam may be the best cow to ever walk our pastures. His first daughters replicate her productive, easy-doing, broody look.

His ability to sire light-birthweight progeny that develop into wide-tracking, high-volume yearling cattle is remarkable. His sons have been maintaining their condition exceptionally well in the breeding pasture.

Again this year, this sire group is very uniform, from the first to the last bull.

Boardwalk is a model Angus sire that exemplifies the qualities that have made the breed popular.

We own him with Maher Ranch and Wright Charolais and Angus.

Left: EA Pride 346, Boardwalk's \$52,000-valued donor dam.

You will easily find this bull when you walk through the pens on sale day. Much like his sire, Ellingson Boardwalk 6435 is a fault-free bull that achieves both superior maternal and growth traits – something that is only found in select animals. He stands down on tremendous substance of bone and has impeccable foot structure. He is also stout made and easy fleshing. He is triple-linebred to the Madame Pride cow family, tracing twice to the \$52,000-valued EA Pride 346 and once to the \$42,000-valued EA Madame Pride 0040. He weaned off his dam at 895 pounds, good enough to earn a 112 weaning ratio against his fall-born contemporaries. This is without question an ideal breeding bull that will inject functionality into a cowherd and will be a female-maker deluxe. Count on him to provide many years of valuable service wherever he is employed. **This is a fall-born bull.**

Dam's Nursing Ratio: 4/104 \$W: +59.32 \$B: +111.81

This is a wide-based son of Boyd Authority 3100, the popular Semex sire. His combines the power and low-input genes of Authority with the stoutness and doability that the Blackcap Revolution line is still marveled over. His dam has been a viable producer with a nursing ratio of 4/104, a yearling ratio of 2/103, a ribeye ratio of 2/105 and an average calving interval of 364 days. She has stuck to first-service A.I. every year. A maternal brother sold to Buck and Lori Ward in our 2015 sale. Another maternal brother was the \$17,000 selection of Knife River Ranch last year.

Ellingson Fort Laramie 6169, Lot 174's maternal brother.

Dam's Nursing Ratio: 7/106 \$W: +57.93 \$B: +104.86

Ellingson Authority 7265 is perhaps the highest performer of any Final Answer paternal descendant in the sale. He weaned off his dam at 935 pounds to earn a weaning ratio of 107 and has posted tremendous gains ever since. His Territory dam never fails to bring in one of the heaviest calves each fall. She has a production nursing ratio of 7/106, a yearling ratio of 2/110, an IMF ratio of 2/104 and a ribeye ratio of 2/110. She is a longevity extraordinaire and a 7/8 sister to the granddam of the \$25,000 Ellingson Identity 9104. Maternal sisters are working for Spring Grove Ranch, Mike Rogstad, Maher Ranch and Circle W Angus Farms.

Dam's Nursing Ratio: 1/105 \$W: +56.65

Ellingson Authority 7002 is a wide-based, soft-middled bull that offers a strong resume to go along with his real-world phenotype. He should be a sleep-all-night heifer bull with an actual birthweight of 56 pounds. Yet, he should also add payweight, as he earned a 105 weaning ratio last fall. He will sire an optimum growth curve, allowing his daughters to be efficient grass-converters. He combines the timeless sires of Authority, Commanche, Territory and Bando 598. His Territory granddam is a powerhouse female that is hands-down the boldest sprung female on the ranch and continues carving out her legacy at 10 years of age. Maternal brothers to his dam are working for Craig Braaflat, Tim Schmidt, Diamond Arrow S Ranch and Diede Ranch.

Reference Sire: *Motivation*

Motivation is a refreshing pedigreed bull that we purchased in Canada. He is an impressive-looking bull with great extension from end to end and a massive hindquarter.

His dam topped the Soo Line Dispersion Sale and is now a donor at Brooking Angus. His first daughters possess her tremendous udder quality and productive look.

Motivation progeny display the antagonistic traits of moderate birthweights and excellent muscle definition. They have ideal foot structure, which will encourage longevity.

As an outcross pedigree, his sons will be able to be used on nearly all bloodlines.

We own him with Rod Campbell and Genex CRI.

Dam's Nursing Ratio: 4/105 \$W: +54.73 \$B: +100.62

This is perhaps one of the most phenotypically and genotypically complete bulls in the offering. He should be considered a female-maker deluxe due to his explosive rib shape, softness, squareness and athleticism, but, most of all, because of his strong maternal heritage that backs him up from both sides of his pedigree. He has an optimum growth curve that can be appreciated by cattle producers who have limited feed resources. He weaned off his dam at 940 pounds to earn an impressive 107 weaning ratio. His dam is a premier producer year in and out. She has a production birth ratio of 4/97, a nursing ratio of 4/105 and a yearling ratio of 1/105. His maternal sister was one of the feature lots in last year's sale and was selected by Holt Farms and Clarence Tays and Sons for \$10,000. Make sure to keep every daughter out of this bull.

Lot 177, Ellingson Motivation 7255.

Dam's Nursing Ratio: 4/103 \$W: +42.71 \$B: +138.31

Motivation 7367 is the widest tracking and most expressive bull in his sire group. His progeny should be high weight-per-day-of-age cattle on their mothers and in the feedlot. His dam specializes in injecting pounds and stoutness in her progeny. He is a maternal brother to the top weaning and yearling weight bull of the 2016 calfcrop, Ellingson Roosevelt 6173. He was selected by Gullickson Ranch for \$16,000 in last year's sale.

Reference Sire: *International*

International was employed in a few premier flushes, which have achieved tremendous results. He is a product of the Emblynette cow family that has been a part of our family's program for nearly eight decades.

He is a true performance standout, injecting muscle mass, substance of bone and scale in his progeny. He is a one-generational modifier, adding payweight to his calves.

His Traveler 004 dam has proven herself as a high-end producer and is a sixth-generation Pathfinder dam.

Those who sell their calves by the pound will have no trouble identifying the genetic merit of this phenotypic gem. He displays tremendous middle, depth of flank and functional traveling ability. We expect him to sire the same level of performance as his sire, but be maternally superior. His added age should allow him to cover more females in his first breeding season in comparison to his yearling counterparts. It is no secret that he reigns from an elite line of Emblynette females that have been top income-producers. He is a maternal brother to Ellingson Format 2205, the \$42,000 Alta Genetics sire, while a full brother was selected by Cody and Amber Staiger for \$12,500 in our 2017 production sale. Other maternal brothers are working for Benny Bachand and Knapp Ranch. His \$36,000-valued Emblynette dam is owned in conjunction with Mohrfeld Angus, and this bull is being offered with them.

Dam's Nursing Ratio: 1/100 \$W: +63.78 \$B: +126.49

This is your opportunity to own one of the most phenotypically superior brood cow prospects to sell anywhere in 2018! She is wide based, easy fleshing and feminine and put together in a balanced, athletic package. Her outcross pedigree makes her a viable choice for nearly any program. Her balanced-trait package and stellar eye appeal should allow her to be successfully mated to almost any sire. Her dam and granddam have proven themselves as superior dams in a cowherd that culls strictly on practical, cowboy traits. Her powerhouse dam is a maternal sister to Ellingson Format 2205, the \$42,000 Alta Genetics sire whose young daughters have produced some of the premier lots in our past few sales. Her \$36,000-valued granddam is a leader in our donor pen. She represents some of the freshest genetics available from the world-revered Emblynette cow family. She is destined to be a Pathfinder and donor dam. She is being offered in conjunction with Ryan and Bridget Van Zee.

Dam's Nursing Ratio: 1/121 \$W: +88.97 \$B: +118.08

EA Emblynette 7480 perfectly represents what we strive to produce in an Angus female. The amount of center rib shape, base width and style that this female offers is nearly impossible to find. She pairs unmatched genotypic and genomic tabulations with her eye appeal to make the perfect poster child for the first calfcrop being offered out of her ST Genetics sire. Being double-bred to the powerful Emblynette cow family gives her a genetic advantage over her peers. Her background points to her having an ideal growth pattern, with extreme growth her first year and then moderating into an ideal-sized female that will be easy to maintain when she is mature. She earned a commanding weaning ratio of 121. Her Resource dam is a powerhouse female that was picked out by many ranch visitors last summer for her eye-appealing design and softness. Lots 194 and 195 are nearly cookie-cutter molds of each other. Both have the credentials to make major impacts on the breed and the broader beef industry.

Rowdy Benson takes bids from the eastern seating section at last year's sale.

BW: 79 205 WT: 654

Dam's Nursing Ratio: 5/102 \$W: +42.2 \$B: +123.09

Emblynette 7171 will be one of the first daughters to sell out of the \$50,000 Semex Beef selection from our 2016 production sale. She perfectly represents the style and femininity, rib shape and shear balance we are finding in our Top Shelf daughters. This heifer should be on your short list, because she has credentials to achieve the same level of success already earned by many of the individuals that line her pedigree. Her mother has a front-pasture look and could be a model for the Angus breed. EA Emblynette 1085 joined our donor team this past spring and will play a major role in our breeding program for many years to come. Maternal brothers are working for Kost Ranch and Greg Hegland.

Dam's Nursing Ratio: 3/102 \$W: +63.23 \$B: +136.75

This is one of the most prolific females that has ever been offered from our cowherd. There is no other Rampage daughter in the breed that can equal her authentic Angus look. She is an explosive performance female that weaned off her dam at 810 pounds without creep feed to earn a weaning ratio of 117. She also ranks near the top of the breed for weaning and yearling weight, confirmed in her genomic evaluation. Her level of performance is apparent when you analyze her outstanding base width and length from end to end. More importantly, she has the design of a front-pasture donor, being smooth and classy fronted, having a bold rib shape and covering her track fluently on the move. Her Plateau dam is a powerhouse that has an average nursing ratio of 2/116. Those who are looking to incorporate some of the hottest genetics available in the breed today without sacrificing cow sense and functional, real-world traits should take a look.

EA Queen Dolly 7177 is perhaps the most powerful Powerpoint daughter that was born on the ranch last spring. Still, she is very elegant, smooth, long sided and cowy in her appearance. She earned a noteworthy 108 weaning ratio and posts weaning and yearling EPDs that are in the top 2 percent of the entire Angus breed. She combines Powerpoint with Earnan, Traveler 004, Bar EXT, Anchor and Traveler 6807 in her solid pedigree. She reigns from a line of females that are pillars of structural correctness and longevity. Her granddam is still productive at age 14. We expect her progeny to thrive both in the feedlot and in grass-based environments.

Lot 207, EA Queen Dolly 7177.

Dam's Nursing Ratio: 1/111 \$W: +60.15 \$B: +124.64

One of your opportunities to select some of our finest genetics comes in this female. She combines Powerpoint with the Blackclass 124 line. She earned a dominant weaning ratio of 111 when she marched across the scale this fall. Her dam is a flush sister to the \$50,000 Ellingson Versatile, a resident at ST Genetics A.I. stud, and the \$18,000 Ellingson Real Business 5168 at Alta Genetics. Her maternal sisters have some of the feature Powerpoint lots in the bull section of the sale. Some are definite A.I. stud prospects. Her dam is one of nearly 30 full and half sisters that you will see a lot from over the next few years. This heifer could very well be related to the next hot, young sire many around the country will be ordering semen on.

BW: 79 205 WT: 622

Dam's Nursing Ratio: 8/98 \$W: +34.8 \$B: +99.03

This Resource daughter is out of a Tradition dam that has stood the test of time and is entering her 11th year of production. Maternal brothers are working for Knapp Ranch, Alleman Land and Livestock, Kim and Chantz Entze and Steve and Sal Roseland, while maternal sisters are working for Spring Grove Ranch, Jared Brown and Holt Farms. One maternal sister has been retained in our herd and has an average nursing ratio of 3/107.

Dam's Nursing Ratio: 1/113 \$W: +67.15 \$B: +127.62

This is a massive-ribbed female that runs two generations deep with Ellingson-bred sires, combining Top Shelf and Secretary. She is a high-dolcility female that has the genetics to perform with the best in the feedlot, yet still maintain her condition with minimal inputs. She weaned off her dam at 760 pounds without creep feed to earn a weaning ratio of 113. Don't miss out on one of the very few females being offered by Semex's \$50,000 Ellingson Top Shelf 5050.

EA Mollie 7289 is a powerful brood-cow prospect out of the \$70,000 Ellingson Roughrider 4202, a resident A.I. sire at Genex. The Roughrider-Cowboy mating has turned out to be very successful – so well, in fact, we bred all our Cowboy daughters to Roughrider this year. EA Mollie 7289 will be one of the first and one of the few daughters of Roughrider available at public auction. She came off her dam at 735 pounds this fall to earn a weaning ratio of 108. Her Pathfinder dam has an average nursing ratio of 4/106. A maternal brother is working for Sheldon Holte. A full brother was a featured picture bull in last year's sale, selected by Clint and Heather Diede of the Diede Ranch of Richardton for \$15,000.

Above: Lot 213, EA Mollie 7289.

Here is your chance to select a member of the Everelda Entense cow family. She earned a weaning ratio of 108 last fall. She has a fancy look, extra rib and softness and can travel like a cat. She is royally bred to be a maternal sensation. Her VRD dam is a granddaughter of the record-selling Sitz Everelda Entense 023. A full brother was selected by Joel Evensvold in our 2017 production sale.

FFA Memories

It was a special year for the Ellingson teens in FFA. Stetson had the honor of serving as the North Dakota State FFA Vice President alongside six other outstanding officers. He was also the State FFA Beef Entrepreneurship Proficiency Award winner with his Angus project. Jameson earned his state FFA degree and was the state winner of the Forage Production Proficiency Award. His Supervised Agricultural Experience Program centers around the work he does managing the farming enterprise here. Sierra was named secretary of the day at the District Leadership and was part of the state-qualifying parliamentary procedure team.

EA Blackbird Revella 7416 is a light-birthweight heifer that offers an abundance of shape and eye appeal, which is not typical of negative-birthweight-EPD cattle. She is expressive over the top, into her hindquarter and to her base. A full sister is in our bred heifer replacement pen.

Ellingson Hometown 7173, a 3/4 brother to Lot 228.

The Wyly family of Fort Pierre, S.D., selected a group of Resource sons at last year's sale.

FROM THE HEART OF OUR CUSTOMERS' HERDS

Commercial Females

We're excited to include a commercial female division in our sale to showcase some of the producers who have an Ellingson Angus bull battery. Throughout the year, we work closely with Jim Erickson at Stockmen's Livestock in Dickinson to market many customers' cattle. Jim knows the cattle in the offering and can be of assistance to those interested in learning about them. The cattle are broody, feminine, replacement-quality females from herds that have long histories of producing profit-oriented cattle. The females are bangs vaccinated and dewormed and have had three rounds of modified-live vaccination. The bred heifers have also all had their ScourGuard vaccine. The cattle will be available for viewing beginning Feb. 1. Contact us, the producers or Jim Erickson at (701) 290-4861.

229-453

Prairie Diamond Ranch, Hebron & Richardton, ND

225 ANGUS HEIFER

CALVES: The Prairie Diamond Ranch heifers have been popular in past sales, selling across America. These heifers are broody and feminine and will make front-end cows. The steermates have always been some of the most sought-after steers in North Dakota. The heifers are out of sons of Resource, Substance, Identity,

Blackcap Revolution, Net Worth and Bandwagon. Prairie Diamond Ranch runs only top-tier bulls and has used A.I. for many generations. The cowherd is heavily influenced by BAR EXT,

Final Answer, Gridmaker, Predestined and Territory. The heifers have USDA-approved EID tags. The average weight is anticipated to be 760 pounds.

Kellen & Lori Unruh:
(701) 878-4152

Cody & Amber Staiger:
(701) 290-4356

Tim, Kathy & Garrett Meyer:
(701) 290-0172

454-533

Howard Ranch, Sheyenne, ND

80 ANGUS HEIFER CALVES:

Howards always bring high-quality, performance-oriented, sound-structured females with quiet dispositions. Howards take pride in their cowherd and are very particular on their bull selection. They almost exclusively purchase embryo transfer half brothers to bring consistency to their calves and to inject superior maternal traits into their cowherd. We have marketed Howards' steers for seven years. They are always easy to sell because of their great reputation. These heifers are sired by sons of New Day, Gridiron, Plateau and Dominance.

Allan & Lisa Howard:
(701) 302-0495 or (701) 996-2805

534-583

Leintz Ranch, Raleigh, ND

50 ANGUS HEIFER CALVES: Robert Leintz is a first-time consignor to our commercial heifer auction. He has a big, growthy set of heifers that will make excellent high-performance brood cows. They are the type of females that will bring home heavy calves each fall. The Leintz steers always top the market in Mobridge, S.D., when they sell each fall. These heifers stem from Blackcap Revolution, Advance and Identity. The cows have a heavy influence of Traveler 004 and Vermilion Dateline.

Robert Leintz:
(701) 597-3115

Nearly 500 high-quality commercial Angus and black baldy heifers are up for grabs on Feb. 3. Don't miss this chance to share in the maternal excellence provided by some of our long-time customers.

584-663

Gullickson Ranch, Cannon Ball, ND

80 ANGUS HEIFER

CALVES: The Jay and Salena Gullickson family is bringing heifers to the sale for the first time. This is a set of broody females with excellent maternal strength. They run a well-disciplined cowherd that always weans a big set of calves that are sought out by top feeders. The heifers are sired by sons of Earnan, Net Worth, Sinclair Extra and Gridiron. The cowherd is greatly influenced by Traveler 004 and Density bloodlines.

Jay & Salena Gullickson:
(701) 471-2439

664-734

Katus X7 Ranch, Watauga, SD

71 ANGUS & BLACK BALDY BRED HEIF- ERS:

The Katus program has a history of selling top-quality bred heifers. They have purchased some top Territory, Final Answer, Resource and Earnan sons and used them A.I. These females will be self-sufficient and produce calves that have gainability. Katuses background their steers and sell a set that always tops the market.

Lots 664-688: 25 Angus bred heifers that originated from the Gullickson Ranch. These heifers are A.I. bred to Koupal Advance and due Feb. 26.

Lots 689-713: 25 Angus bred heifers sired by Ellingson Gratitude 3044. These heifers are A.I. bred to Koupal Advance and due Feb. 26 and bred to an Ellingson Identity 9104 son and due starting in March.

Lots 714-734: 21 black-white-face heifers A.I. bred to Ellingson Icon and due starting Feb. 26.

Scott & Heather Katus:
(701) 455-3715

The commercial heifer offering includes both high-quality bred and open heifers from some of our long-time customers.

Real-World Performance Genetics from Ellingson Angus!

The first Saturday in February will once again bring one of the most anticipated bull sales of the spring bull sale season as the Ellingson family hosts its annual production sale. Each year, this exciting event is attended by some of the country's top cattlemen – both commercial and purebred – as they have discovered the value of doing business with this premier family-owned operation.

In the bull offering this year, the quality runs as deep as ever. You will be amazed at each sire group being offered in the sale and will no doubt appreciate the way these bulls are developed – expressing their genetic potential to perform, yet maintaining a condition all cattlemen can appreciate. These bulls are truly backed by one of the breed's strongest cowherds, with selection pressure placed on sound, functional traits that require superior feet and legs and fleshing ease without sacrificing performance or eye appeal. If you have never had the opportunity to go through the Ellingson females, I would encourage you to make it a priority to see the impressive set of cows behind all of the bulls selling.

Regardless of the sire group you go through at Ellingson Angus, you are going to find bulls to fit any program's needs. It is a unique opportunity at Ellingson Angus to find a set of bulls with these kind of impressive EPD profiles and pedigrees that will work in almost any situation. Each year, prominent purebred programs and A.I. studs select bulls from Ellingson Angus due to the strong reputation of the Ellingson family and the kind of genetics they produce year in and year out. In addition, the industry's top commercial cattlemen turn to Ellingson Angus for their herdbull needs, as they know the commitment the Ellingson family has to work with them throughout the year in adding value to their own calfcrops. They also appreciate the genetic flexibility this program offers.

A fancy set of yearling replacement females will also be offered right from the heart of the Ellingson Angus replacement females. After recently going through these heifers, I have no doubt that you will agree that this is the best set of replacement heifers ever offered. These heifers have a tremendous amount of style and eye appeal with a great deal of rib and body shape. They are backed by the same superior genetics as their bullmates selling. Several donor-quality females are being offered. They are deep in quality!

It is a pleasure to be working with this family-owned Angus operation, where they are as committed to their customers' success as any other program in the business. When you invest in Ellingson genetics, you are investing in a relationship that will last for years to come, and I am confident you will not find any program more committed to your success than this one. If I can help discuss the genetics that are being offered this year, please don't hesitate to give me a call at (918) 510-3464.

Sincerely, *Rance Long*

Real-World Benefits

For You, Our Valued Customers

- Raised and sold at the ranch
- Sires and dams are available for viewing
- Complete vaccination program
- Complete performance information
- Guaranteed free of known genetic defects
- Free keep of bulls until April 1, 2018
- Free delivery of bulls in April
- \$100 off if you haul your bull after sale
- Free semen evaluation
- Feeder and heifer calf marketing aid
- Sight-unseen purchases guaranteed
- Satisfaction guaranteed
