

Ellingson Angus

2019

Real-World Genetics

ANNUAL PRODUCTION SALE

1 pm CT • Saturday, Feb. 2, 2019

At the Ranch • St. Anthony, ND

Welcome!

Dear Friends,

We would like to invite you to our ranch for our production sale on Feb. 2. Each year, it is gratifying to have some of the most respected registered and commercial cattle producers join us sale day. We are eager to showcase our newest genetics that embody the strict credentials of type, kind and performance that you have come to expect from Ellingson Angus.

We have a large offering of progeny from our two 2017 high-selling bulls, Ellingson Homestead and Ellingson Homegrown. These two major A.I. stud bulls, along with numerous other lead-off bulls from our past sales, are making a great impact on our program and many other programs around the globe.

In 2018, we committed even more time and resources into working with our customers. The continued success of the Ellingson-Topp Heifer Program and expanding markets for Ellingson-sired commercial females have allowed us to grow marketing opportunities for programs with an Ellingson Angus bull battery. This and the excellent reputation of Ellingson-Angus-sired feeder calves have given commercial producers a good return on their investment in our bulls.

While there are many advantages to being an Ellingson Angus bull customer, we believe your best reward will come from the added "real-world" genetic merit you will reap. Nothing is more gratifying than getting reports from customers that our bulls have added performance, stayability and profit to their operations.

Our genetic decisions are based primarily on what we see firsthand working with our commercial customers. There isn't any better education than sorting a set of feeder calves, while evaluating their dams for maternal functionality; breeding and marketing hundreds of commercial heifers each year, while seeing the true merits of fertility and structural soundness; or owning and finishing a few pens of cattle and studying the closeouts. These experiences have given us more genetic insight than we could have gained in a lifetime without them.

We are excited to add a donor cow division this year. For the first time, we will offer five elite donors in our sale. These females are proven producers that have already had a great impact on our operation. They will have progeny headline our sale in years to come. We are certain these females can make a lasting impact at their new homes and in the Angus breed. While this was a big decision, we wanted to begin to share more from the nucleus of our program. We are proud of our cowherd – its production and its structural integrity. We know a strong program can only be built around a strong cowherd.

We welcome you to come evaluate the offering on sale day or any time before. We would like to personally visit with each of you so we can match your program with the best genetics for your situation. We use most of the genetic measurements available and believe that they, used in combination with good cow-sense, will yield the best outcome.

Sincerely,

Chad Ellingson

Ellingson Angus

ANNUAL PRODUCTION SALE

Saturday, Feb. 2, 2019

Lunch at 11:30 a.m. CT • Sale at 1 p.m. CT • At the Ranch • St. Anthony, ND

Sale-Day Phones

Office: (701) 445-7309 or (701) 445-7300

Chad's cell: (701) 361-3606 • Julie's cell: (701) 214-7709

Stetson's cell: (701) 595-1364 • Jameson's cell: (701) 226-8645

Sale Location

The sale will be held at our ranch sale facility near St. Anthony, N.D., located approximately 30 miles from Bismarck/Mandan, N.D. From Mandan, go 19 miles south on Highway 6 until County Road 135. There, turn left (east) and follow the gravel road for 5 miles to the ranch and sale site. Use Google Maps, not GPS, for directions.

Lodging

A block of rooms has been reserved at the Ramkota Hotel in Bismarck for \$99 plus tax. To make reservations, call (701) 258-7700 by Jan. 25 and mention the Ellingson Angus Sale to take advantage of the discounted rate.

Guarantee

These animals have been managed carefully to ensure your success. The cattle are guaranteed to be fertile and reproductively sound in accordance with the recommendations of the American Angus Association. All bulls selling come with a first-year breeding season guarantee against injury or infertility issues. "Breeding season" is defined by the time of turnout to 60 days later. All bulls will have passed a semen evaluation before being delivered. If any fertility problems happen during the first breeding season, a replacement bull will be available until the purchased bull's long-term fertility can be determined. If a bull sustains a breeding injury during the first breeding season, a credit on a future bull purchase will be given. If a bull sustains an injury or fertility issue, we ask that it is evaluated and treated immediately by a veterinarian and a report is provided by the veterinarian doing the evaluation. If the vet determines the bull is no longer a fertile and mobile breeder, the following formula will be used to determine credit issued on a future purchase: purchase price - salvage value - \$2,500 (if injury related) = credit.

Terms of Sale

Settlement is to be made on sale day. Cattle will not be released until payment is received. All registered animals will be transferred. One-hundred percent revenue-sharing interest is being sold on all bulls with only within-herd semen use being retained.

Auctioneer

Joe Goggins: (406) 373-6844 or (406) 861-5664

Sight-Unseen Purchases

If you are unable to attend the sale, but wish to place a bid, call Chad, Julie or Stetson Ellingson, Pat Maher, the auctioneer or any of the sale-day representatives. We will handle your bid like you would if you were in the stands. Your satisfaction is guaranteed. Our sale will also be broadcast live on DVAuction. For information, contact Justin Dikoff at (605) 290-0635 or jdikoff@dvauction.com.

Genetic Information

All registered bulls and heifers in the sale have had an HD 50K test, and the EPDs listed reflect the 50K analysis. The test verifies parentage and increases the predictability of economically important traits.

Performance Data

The performance information, with the exception of the 365-day weights, has been calculated through the Angus Herd Improvement Records (AHIR) program of the American Angus Association (AAA). These are official numbers from the organization's Sire Summary (as of Dec. 8, 2018). At the time of printing, most of the bulls didn't fit the age parameters to process adjusted yearling weights through AHIR. Projected yearling weights noted were calculated using the AAA's yearling weight formula. There will be a supplement sheet available on sale day.

Health

Dr. Pat Bierman of the Mandan Veterinary Clinic will be on hand to write interstate health certificates for those requiring them. All cattle have had a complete vaccination program.

Delivery

We are offering free delivery on all bulls to central points in the United States and to Canadian points-of-entry. For all females, we will help coordinate delivery to get the cattle to you as economically as we can.

Feeding Arrangements at No Charge

We are offering free keep on the bulls until April 1, after which time we will start deliveries. If you decide to take your bull home within three days of the sale, we will give you \$100 off your bull. Free keep and free delivery do not apply to the females in the sale.

Photographs

The pictures of the 2019 offering in this catalog were taken Nov. 20-21.

LT Territory 5824 of EA
SAV Alliance 2606

We are thrilled to present the first calfcrop of Ellingson Homestead 6030. His first calves have solidified his phenotypic and genotypic potency. Homestead progeny are well-constructed with lots of size and shape and as much length of side as any sire we have ever used. His sons have posted outstanding gains on feed, which we expect to translate into more profit potential for the cattlemen using him.

The anchor sires of Homestead's pedigree, Remedy and Territory, have tremendous daughters, and we expect nothing less from Homestead.

All who have seen him have admired him. He is currently one of the top sellers at ST Genetics.

Homestead is owned with ST Genetics.

Left: CTS Remedy 1T01, the sire of Ellingson Homestead 6030.

Dam's Nursing Ratio: 3/105 \$W: +75.02 \$B: +159.06

There is no better way to lead off an offering of bulls that represent our finest work yet than with a bull of this caliber. Ellingson Homestead 8202 may be the most balanced individual in the entire sale. He features common-sense traits that are critical to the bottomline of real-world cattle producers. Lot 1 was an early favorite alongside his donor dam by Advance, and he continues to be impressive. He replicates the same unmistakable herdbull presence that his sire did as he captured the attention of Angus breeders worldwide. Lot 1 weaned off his dam at 990 pounds and earned a weaning ratio of 112. His dam is one of the best young females in our cowherd. She is the first of what will be many Advance daughters to find their way onto our donor roster. This distinctive female solidifies our trust that Lot 1 will be a valuable breeding machine wherever he goes. His maternal brother by Remedy was a standout in his calfcrop and was selected by the Harris Ranch, where he is being used with success in the family's large commercial heifer breeding program. Lot 1's maternal sister is one of our favorites in the bred heifer pen this year.

Lot 1, Ellingson Homestead 8202.

Dam's Nursing Ratio: 1/120 \$W: +69.52 \$B: +168.85

Ellingson Homestead 8062 is a legendary breeding bull in the making. He more than fulfills all the parameters to be considered with the most elite. He is one you will like from a genomic and EPD standpoint, but, most importantly, he is one you'll like for his type and kind when you see him in person. His performance resume is second to none and would rank with the best that have ever graced Ellingson Angus. Rarely do you come across a bull like this with so much power paired with flawless phenotypic balance and structural integrity. Like his sire, who is the high-selling bull for our ranch, Lot 2 portrays an unmistakable herdbull presence with tremendous length of side and levelness. He pounded down the scales this past fall at 1,025 pounds to earn a weaning ratio of 120. He was a masterpiece to observe as he stood next to his dam this fall, as he had nearly outgrown her. All the while, she stayed in great condition. She is everything we look for in a brood female and has a bright future ahead here. His Pathfinder granddam has left a tremendous legacy here too, along with his great-granddam, the \$35,000-valued donor that is the matriarch of our favorite Emblynette females. Ellingson Commissioner 7267 is a 7/8 brother to his dam. He sold to Wright Charolais and Angus for \$18,000 and was used in our program. Make sure to spend a little extra time studying him, as his credentials are in short supply today.

Lot 2, Ellingson Homestead 8062.

Dam's Nursing Ratio: 8/107 \$W: +51.78 \$B: +119.40

Here is an impressive embryo mating of Homestead and the dam of a popular Genex sire, Ellingson Roughrider 4202. He has an eye-appealing phenotypic package that has been appreciated by even the most astute cattle visitors. Owning a maternal brother to Roughrider out of the first calfcrop from the record-selling bull in our program is an exciting opportunity. A bull with credentials and a pedigree like this is as safe of an investment as you'll find. His dam needs no introduction as the \$60,000-valued donor in our herd. She has a birth ratio of 8/98, a nursing ratio of 8/107 and a yearling ratio of 5/105. His maternal brother, Ellingson 797 Juneau 7121, was selected as a \$19,000 feature in last year's sale by 12 Star Ranch and was utilized back in our cowherd. Other maternal brothers are working for Diede Ranch, Jay and Salena Gullickson, Sam and Tyler Knapp, Diamond Cross Ranch, Allan and Lisa Howard, Colby Epperson, Clarke Crocker and Van Zee Cattle Company.

Lot 3, Ellingson Homestead 8090.

Homestead on Advance daughters has proven to be a valuable mating. Ellingson Homestead 8181 is a direct product of a cow line that consistently produces standout herd bulls. His young dam is one of the best Advance daughters on the ranch and is easy fleshing and feminine fronted with a picture-perfect udder. His Territory granddam is an elite female on the ranch and best known as the dam of the \$23,000 Ellingson Consistent 6235 that is owned by Arntzen Angus in Montana. His great-granddam is the best Final Answer daughter we have ever appraised and is best known as the dam of the \$30,000 Ellingson Frontiersman and \$21,000 Ellingson Drover 6034. This bull has the genetic potential to be a real cowmaker. He is no slouch for performance either, coming off his dam at 935 pounds and earning a weaning ratio of 108. Study his strong, well-balanced EPD profile as well. Don't miss your opportunity to own the offspring of one of our finest cow lines.

Dam's Nursing Ratio: 2/107 \$W: +45.10 \$B: +143.07

This is another high-growth son of Homestead from a cow line that has produced numerous lead-off and high-selling individuals at our ranch over the past decade. His performance and genomic records indicate he should inject pounds into his progeny that will have a strong appetite to gain. His Resource dam is a model Angus female with an exquisite amount of volume and capacity. She is the type and kind to thrive on minimal inputs. He is a maternal brother to Ellingson Progressive 7170, a bull selected by the Katus X7 Ranch as a \$21,000 feature in last year's production sale.

EA Blackclass 6821, Lot 15's maternal granddam.

Dam's Nursing Ratio: 6/101 \$W: +62.28 \$B: +138.15

Here is a thick-topped and big-hipped bull that has a rugged herdbull appearance. He has the structural build and foot design to improve the function in any female he is mated to. He weaned off his dam at 970 pounds and earned a 106 weaning ratio. The most impressive thing about this bull is the maternal heritage he is rooted in. The females that are in his pedigree are time-tested for production, structural soundness and fleshing ease. His dam is now 9 years old and remains in tremendous condition with a picture-perfect udder. A maternal brother was selected by Castle Butte Angus in last year's sale, while three of his maternal sisters are leaving their mark on our operation. One of them had a high-selling heifer in our 2018 production sale.

This is an extreme growth prospect that will be appreciated by those who strive to produce market-topping feeder calves. He will add size, length and thickness to his progeny. Having come off his dam at 980 pounds and earning a 110 weaning ratio, he has proven his performance credentials. Along with added performance at weaning, his progeny are sure to be tremendous gainers on feed. His dam is a beacon of longevity, having near-perfect structure and tremendous fleshing ease even going into her 11th year of life. Maternal brothers are working for Tom Waldock, Buck Ward, Terry Wilkens, Penhros Farms and Mark and Judy Hoff. His two maternal sisters both have earned the coveted Pathfinder status.

EA Queen 3325, Lot 16's maternal sister.

Ellingson Icon 5062, Lot 19's maternal brother.

EA Emblynette 3311, Lot 19's dam.

EA Emblynette 2091, a maternal sister to Lot 19's dam.

Ellingson Homegrown 8108 proudly represents the first calf-crop of his popular Genex sire. He has authentic Angus breed character and the type and kind to be a real cowmaker. He is moderate in his frame score with tremendous spring of rib, softness and natural width throughout. He is smooth profiling, square hipped and sound footed. His outcross lineage should make him employable in many cowherds today. Combining Homegrown, Advance, Dominance, Traveler 004 and EXT in line, you should expect daughters that foundations can be built from. His actual data, confirmed by his genomic data, indicates that he should be a sleep-all-night heifer bull. He ranks in the fourth percentile for CED and the seventh for birthweight. His great-granddam is still in production at Ellingson Angus at 13 years of age. He and his dam were some of the most asked-about cattle on the North Dakota Angus Tour this fall. If your goal is to apply downward pressure on mature weight and height while still increasing weaning and yearling weights, Ellingson Homestead 8108 can help you achieve your production goals.

Here is a sleep-all-night heifer bull that combines many generations of the finest Ellingson Angus breeding. Ellingson Homegrown 8037 aligns Homegrown, Chaps and Territory in his pedigree. These are some of the greatest sires to ever be produced here. He boasts one of the lightest birthweight EPDs in the sale and ranks in the first percentile for birthweight and the third percentile for calving-ease direct. Even as a strong calving-ease prospect, he is wide based and expressive in his muscle pattern.

Dam's Nursing Ratio: 1/96 \$W: +63.77 \$B: +124.44

This is another well-balanced calving-ease prospect that portrays added stoutness and body capacity. His actual data shows that he should be safe for use on virgin heifers, and his genomic profile has validated that. He is backed by a strong maternal heritage, having all of his first six dams still in production on the ranch today. He has the phenotype and cow history behind him to be a dominant maternal force for your cowherd. A maternal brother to his dam was selected by Isaac Sutton at our sale last year.

Powerpoint is gaining worldwide attention as one of the elite young calving-ease and maternal sires available in the A.I. industry today.

He was selected as the standout among his contemporaries for his growth figures, carcass traits and eye-appealing phenotype. Most importantly, we were thrilled by his dam and granddam.

His first sons were well-received by commercial and purebred cattle ranchers. Seven of his sons that sold last year were used through A.I.

Select a Powerpoint son for their outcross ancestry, curve-bender EPDs and because you'll fall in love with the bull in person.

He is owned with Spickler Ranch North and ST Genetics.

Left: Ellingson Proposition 7103, a Powerpoint son that sold for \$18,000 to Peak Dot as a 2018 sale feature.

Dam's Nursing Ratio: 1/109 \$W: +66.83 \$B: +146.74

This impressive Powerpoint son has the physique of a real beef bull with curve-bending figures. He is long sided with added base width and rear quarter all put together in a correctly designed package. He is a full brother in blood to Lot 44. The two make a dominating pair. Their Capitalist dams were the only resulting females from their flush, and they haven't missed a step. A true testament to the genetic level they possess is the fact that they produced Lot 43 and Lot 44 on their very first try! The bulls' donor Blackbird granddam is a powerhouse Territory-6106 female that is often a favorite of ranch visitors. Lot 43 came off his 2-year-old dam at 910 pounds, earned a weaning ratio of 109 and hasn't looked back since. His genomic predictions identify him not only as a strong calving-ease and growth prospect, but one, even more importantly, that ranks near the top of the breed for fertility measures like heifer pregnancy and scrotal circumference. Ellingson Powerpoint 8179's strong economic-driving traits will allow him to be successful even beyond the breeding pasture.

Anybody that has a deep appreciation for cattle that catch your eye should have no difficulty finding this standout on sale day. He combines authentic Angus breed character with tremendous power and depth in an athletic package. He travels freely on a solid set of feet. His pedigree makes him a strong calving-ease prospect. Still, he is the most powerful son of the outcross Powerpoint sire that we have raised to date. He came off his 2-year-old dam at 930 pounds to earn a weaning ratio of 111. His dam is a broody female with strong structural components. His Territory granddam serves on our donor roster and is best known as the dam of Ellingson Arapahoe 4075 at Alta Genetics and Ellingson Apache 3189, a bull owned with Don Zimbleman. Combining Powerpoint, Capitalist, Territory, EXT 6106 and Bushwacker, his maternal roots run deep.

Dam's Nursing Ratio: 1/104 \$W: +79.78 \$B: +136.84

This is one of our personal favorites and a bull that never fails to catch your eye as you walk through the bulls. He defines the meaning of balance – both in his phenotypic and genotypic measurements. He packs a tremendous amount of muscle and depth into a moderate frame score. He shows to have successfully bent the growth curve, starting out in light-birthweight fashion, but still performing well at weaning and yearling time. He has many generations stacked together of proven low-birthweight genetics used in large commercial projects. His maternal heritage is strong, as he comes from the famed Madame Pride cow family. The best attribute of this bull may be his gentleness. He ranked in the first percentile for docility. He deserves serious consideration from those who want to perpetuate common-sense, profit-ensuring traits.

EA Pride 346, Lot 50's anchor dam.

Dam's Nursing Ratio: 3/102 \$W: +66.78 \$B: +146.61

This is a long-sided Powerpoint son from the popular Blackbird cow family. His dam has been a sound producer, posting a nursing ratio of 3/102, an IMF ratio of 1/108 and a ribeye ratio of 1/110. His maternal sister was selected as a feature in last year's sale by Tamme Valley Farm. Jacob Tamme has reported that she is one of his favorites and that she will be entering his donor pen very soon. Another maternal sister is working in the Spring Grove Ranch herd.

Ellingson Powerpoint 8493 is a sound calving-ease option that combines Powerpoint and Territory 1154, both bulls that have been used successfully on a volume number of virgin heifers. He stems from EA Pride 346, the matriarch of our best Madame Pride females and the dam of the \$28,000 Ellingson Boardwalk 3032.

Customers analyze the yearling bull offering at last year's sale. Jeremiah and Steve from Gottsch Cattle Company are in the foreground.

SAV Blackcap May 4136

EA Hyalite Lady 1333

Tehama Blackcap Revolution
EA Hyalite 7809

Transcend is one of the widest tracking, thickest topped bulls produced at Ellingson Angus. He is an extremely high-growth and ribeye bull in a realistic frame score. He has one of the strongest EPD profiles of any Resource son in the industry. Together with his outcross and strong maternal pedigree, he is a must-use sire.

Transcend is backed by some of the best cows here on the ranch. His Pathfinder dam is now on the Ingram Angus donor roster and has two sons being used here. His granddam and great-granddam are the mothers of many high-sellers and have served as donors. His maternal sister is also a donor.

He is owned with Spickler Ranch North.

Left: EA Hyalite Lady 1333, Transcend's dam and now a featured donor at Ingram Angus.

Dam's Nursing Ratio: 3/110 \$W: +71.97 \$B: +157.6

Ellingson Transcend 8007 is possibly the greatest Resource descendant that has been produced at Ellingson Angus. His unmistakable herdbull look makes him easy to find amongst his contemporaries. He has amassed a resume of achievements like none other. He is a no-hole individual with as balanced genotypic and phenotypic traits as you'll find anywhere. He earned the honor of being the heaviest weaning weight bull in the history of the ranch, coming off his dam at 1,150 pounds and earning a commanding 122 weaning ratio. His performance credentials are impressive, although his maternal heritage is what solidifies his authenticity as a potent breeding piece. His Earnan dam ranks as one of the most elite females on the ranch and portrays impeccable foot and udder quality with tremendous volume and angularity. She records a nursing ratio of 3/110 and a calving interval of 358 days and has settled to first-service A.I. every year. She will soon join the donor lineup, just like her dam and granddam did before her. His granddam, EA Emblynnette 434, is the \$34,000-valued female that is the most influential cow in the Emblynnette tribe. Ellingson Transcend 8007 has the attributes to make a long-term impact far beyond the breeding pasture.

Lot 62, Ellingson Transcend 8007.

EA Emblynnette 4098, Lot 62's dam.

Lot 63, Ellingson Transcend 8161.

EA Emblynette 434, the maternal granddam of Lots 62 and 63.

Dam's Nursing Ratio: 4/107 \$W: +64.13 \$B: +163.14

Pictures are worth a thousand words, and Ellingson Transcend 8161's is no exception to the rule. His powerhouse phenotype and spring of rib are what we try to replicate each breeding season. He came off his dam at 965 pounds to earn a 107 weaning ratio. His Pathfinder dam is one of the best females around, and her influence is well represented in this offering, including her grandson selling as Lot 2. She records a nursing ratio of 6/108, a yearling ratio of 2/108, an IMF ratio of 3/110, a ribeye ratio of 3/113 and a calving interval of 359 days. His granddam was also a model Angus female and a \$34,000-valued donor that served as a strong foundation for our favorite Emblynette females. A maternal brother is working for John Kost. A full brother was selected by Wright Charolais and Angus last year for \$18,000 and was used back in our breeding program.

Dam's Nursing Ratio: 4/99 \$W: +52.16 \$B: +116.62

This Transcend son packs as much natural width and substance into his phenotype as you could find in a bull anywhere. He provides a model of excellence for the growth curve all cattle should follow – extreme growth through the first 14 months of life, then maturing into a realistic size that isn't a burden on your feed bill. He weaned off his dam at 935 pounds to earn an impressive weaning ratio of 106. He is a predictable choice if you're looking to add payweight, as he combines Transcend, Earnan, Net Worth, Really Windy and Bando 5175. Each has accomplished just that in their progeny proofs. Maternal brothers are working for Minnie Ha Ha Angus and Stan Schlosser. A sister is a great young female in our herd. His dam is a maternal sister to Ellingson Scotsman 0010, our 2011 high-selling bull that was selected by Select Sires and Carstens Farms for \$80,000.

Lot 64, Ellingson Transcend 8234.

Ellingson Transcend 8125 is truly the cowboy's kind. His exceptional power and pounds-heavy look will make him popular among those who sell their calves by the pound or feed cattle for a living. He weaned off his dam at an even 1,000 pounds to earn a weaning ratio of 112. Combining Transcend, Earnan and Blackcap Revolution in his lineage, there is no question why he has shattered performance barriers. If you are serious about finding a one-generational modifier for payweight and stoutness, this is your bull. A maternal brother is working for the Diamond Cross Ranch, while a maternal sister is a favorite in our replacement bred heifer pen.

Ellingson Chaps 8025 is one of our favorites in the entire offering. He perfectly illustrates what our breeding program is driven to propagate. He boasts as strong of a maternal lineage as any in the offering, combining Chaps, Motivation, Territory, Traveler 004 and Saugahatchee. He is the product of many generations of strategically planned matings focused around making females with longevity. This bull is balanced both on paper and in the flesh. He is smooth designed with outstanding depth of flank and adequate base width and, most importantly, can move like an athlete. He has a strong curve-bending spread and out-does his popular sire. He ranks in the top fifth percentile for CED, the top 11th for birth, the top 15th for weaning, the top eighth for yearling and the top fourth for docility in his genomic profile. His performance rankings were validated coming off his dam at 975 pounds and earning a weaning ratio of 114. For those with a passion to develop an elite set of females that require few inputs and never get old looking at, this is one of the best young bulls to do just that.

Lot 78, Ellingson Chaps 8025.

Werner EA Motivation 2031, Lot 78's maternal grandsire.

Lot 79, Ellingson Chaps 8035.

EA Emblynnette 434, Lot 79's maternal granddam.

Ellingson Chaps 8035 carries a distinguished herdbull presence and exemplifies authentic Angus breed character. His 2-year-old Emblynnette dam is one of the best young females in our cowherd and is poised to leave a lasting impact. She is broody, functionally structured and has again settled to first-service A.I. She is a direct daughter of a longtime donor, EA Emblynnette 434, the matriarch of many of the great lots selling in this sale. Alongside his dam this summer, they were a pair that was a sight to see. She weaned a high percentage of her body weight when he came off at 975 pounds to earn a 114 weaning ratio. He has posted curve-bending statistics that have been validated by an impressive genomic profile. He portrays the kind of growth curve we find gives the most opportunity to maximize profitability in the beef cattle industry today. He is the cowboy's kind. Also of special note: he is one of the most docile individuals in the entire offering and will probably allow you to scratch him.

Here is a strong performance prospect that results from a coveted mating proven to be successful time and time again. He offers the same muscle shape and stoutness you find in the Chaps line, but with more skeletal size and extension. His dam is a daughter of the Blackclass 124 donor that has more progeny here than any other cow in the history of the ranch. His dam is a maternal sister to the \$50,000 Ellingson Versatile at ST Genetics, the \$45,000 Ellingson Revolution 1047 at Carstens Farms and Albrecht Angus and the \$18,000 Ellingson Real Business 5168 at Alta Genetics.

Dam's Nursing Ratio: 3/102 \$W: +77.02 \$B: +114.44

Ellingson Chaps 8374 is another one of our personal favorites amongst the bull offering. His lineage has been designed for function and eye appeal. His Chaps, Format, Traveler 004 and EXT 473 influence should give him a step ahead of his competitors in making great, long-lasting females. This bull gives up a little age to most of the bulls he is penned with, but you can't tell. He offers outstanding rib capacity and depth of flank, travels wide and square and has a commanding herdbull presence. He should be safe to use on heifers, but expect calves with tremendous calf vigor and growth.

Lot 82, Ellingson Chaps 8374.

Ellingson 797 Juneau 8154 is one of the true gems of the performance race. He has the credentials to sire market-topping feeder calves, yet the maternal heritage to make females with the amenities to be long-term contributors. He weaned off his Substance dam at an astounding 1,025 pounds to earn a 113 weaning ratio. His genomics have validated his growth and have also identified him as an elite ribeye sire. In the maternal department, he ranked in the second percentile for heifer pregnancy, which is the driver for fertility. His dam is a front-pasture female and a direct daughter of the \$52,000-valued EA Pride 346, best known as the dam of the \$28,000 Ellingson Boardwalk 3032. She has settled to first-service A.I. every year, even as she serves as an embryo transplant donor, and boasts a 365-day calving interval. A full brother is featured as Lot 99, while a maternal brother sells as Lot 85. A 7/8 brother is working in Sylvester and Toni Jacobs' cowherd in South Dakota, while four full and maternal sisters have been retained here in our own cowherd.

Cattle producers who sell their calves by the pound, yet still want to make outstanding replacements, won't have a difficult time discovering this performance specialist. He pounded down the scale with a 1,025-pound weaning weight and 112 weaning ratio. His actual data was validated by his genomics, as he ranked in the second percentile for weaning weight and in the first percentile for yearling weight. His Pathfinder dam has a birth ratio of 5/97, a nursing ratio of 5/107 and a yearling ratio of 4/105. She is a modest-sized female with outstanding rib shape and one of the best sets of feet on the entire ranch. A maternal brother is working for Bob Varland, while two maternal sisters and one full sister are working here on the ranch today.

Without question, this is one of the most maternally oriented herdbull prospects in this offering. He has been appraised by some of the most astute cattlemen worldwide and given the seal of approval. He is constructed into a sound package with added base width, rear quarter and volume. Those traits, paired with a moderate frame, should give him the ability to produce daughters that are designed for forage-based environments. His Density dam is one of our favorites in the herd and serves as a third-generation donor dam. She posted a production birth ratio of 6/98, a nursing ratio of 6/101 and a yearling ratio of 2/102. She has a 364-day calving interval and has settled to first-service A.I. every year. Maternal brothers are working for John Kost and Greg Hegland. Four maternal sisters are in our herd.

BW: 98 205 WT: 934 365 WT: 1,456 ADG: 3.26

Dam's Nursing Ratio: 3/111 \$W: +67.75 \$B: +185.31

Lot 121 is, simply stated, the cowboy's kind. He possesses added stoutness, rib shape and structural soundness, attributes in short supply in plenty of bulls today. We expect his progeny will have tremendous performance through their first 14 months of life, then moderate into realistic-sized mature animals that can survive on minimal inputs. This bull is one of our favorite Roughrider sons raised to date, and the statistics he's posted have affirmed his genetic merit. He came off his dam at 995 pounds and earned a weaning ratio of 114. He ranked in the first percentile for weaning and yearling weight, the third percentile for carcass weight and the 12th percentile for heifer pregnancy. His EPDs rank him in the top 1 percent for weaning and yearling weight, carcass weight, \$F and \$B. Pay attention to this bull, as he could be a breeding masterpiece. A maternal brother is working for Jeff Kuntz. His full sister is the most powerful female in the bred heifer pen.

Lot 121, Ellingson Roughrider 8218.

**EA Hyalite Lady 7865,
Lot 121's great-granddam.**

**Jeff Kuntz owns a

Dam's Nursing Ratio: 3/98 \$W: +51.21 \$B: +122.34

Ellingson Roughrider 8111 is a stout-bodied Ellingson Roughrider son from the everlasting Emblynette family. His dam is out of the famed Ellingson Identity 9104 that had been featured at Genex. His \$34,000-valued donor granddam is a major contributor to this year's sale offering, not to mention our overall cowherd. Lot 122's maternal brothers have been selected by Dan Pocha and Bruce Knapp in our past production sales.

Whenever we have mated our Cowboy daughters to Roughrider, we've seen favorable results, and Ellingson Roughrider 8192 is no exception. He is a direct descendant of the \$34,000-valued Emblynette 434 donor whose influence is strongly represented in this offering, especially in some of the leading lots. This bull offers the stoutness and substance you find from the Roughrider line, except with more size and extension. He is a professional in the performance department, weaning off his dam at an even 1,000 pounds to earn a weaning ratio of 112. A maternal sister is doing an outstanding job as a producer here.

Dam's Nursing Ratio: 5/104 \$W: +57.59 \$B: +120.97

Here is a classic Roughrider son that exemplifies what makes his sire group in high demand by progressive cattle producers. He comes from the Roughrider-Cowboy mating that has proven successful time and time again. His Pathfinder dam records a nursing ratio of 5/104 and has a calving interval of 359 days. His full brother was a \$15,000 feature in our 2017 sale, selling to the Diede Ranch, while a maternal brother is working for Sheldon Holte. His full sister was a picture female in last year's sale and sold to F.M. Stewart.

Dam's Nursing Ratio: 5/108 \$W: +60.81 \$B: +130.48

Ellingson Roughrider 8102 has just what it takes to qualify to be a powerhouse beef sire. He combines the natural thickness and base width of his popular sire with the maternal superiority of his dam, who could be a model for the breed. This bull came off his dam at 985 pounds and earned a commanding weaning ratio of 108. His Pathfinder dam by Cowboy has a birth ratio of 5/99, a weaning ratio of 5/108, a yearling ratio of 3/104, an IMF ratio of 2/101 and a ribeye ratio of 2/107. She boasts a calving interval of 360 days on five calves and has settled to first-service A.I. every year of production. Maternal brothers have sold in past sales to Gary Hutchinson and Clifford Johnson. Study this bull closely, as he has all the traits that will make you profitable.

Dam's Nursing Ratio: 6/104 \$W: +60.73 \$B: +116.8

Ellingson Roughrider 8076 and his outstanding donor dam were visitor favorites all throughout the summer, and rightfully so. He offers tremendous stoutness and rear quarter – traits that come standard in the Roughrider line – with added length of side and extension. He weaned off his dam at 960 pounds and earned a weaning ratio of 105. His Main Attraction dam has joined the donor pen, aspirating 76 oocytes in one flush alone last spring. Her impact will continue to be felt for years to come as many full and half siblings are due this spring. She has a birth ratio of 6/96, a nursing ratio of 6/104, a yearling ratio of 2/104 and a ribeye ratio of 2/104, as well as a 364-day calving interval. His maternal sister is the dam of the \$20,000 top-selling heifer in our 2017 sale that sold to Ingram Angus, where they report her having one of the standouts in their 2018 calfcrop. Lot 127's maternal brother was a \$15,000 feature in last year's sale and is owned in conjunction with Maher Ranch. We used him in the breeding pasture last summer.

EA Blackclass 1027, Lot 127's dam.

Dam's Nursing Ratio: 9/100 \$W: +50.17 \$B: +121.57

Ellingson Cowboy Up 8156 is a bull intentionally mated with the progressive commercial cattle producer in mind. He combines the outcross growth of Cowboy Up with a Territory daughter that is the broodiest female on the ranch. His dam is an absolute powerhouse female that is heavy milking and boasts a calving interval of 362 days. He weaned off his dam at an impressive 980 pounds to earn a weaning ratio of 111. He has even surpassed our expectations for performance targets and outstanding eye appeal. His genetic potency will give him the ability to sire feeder calves that will bring a premium in whatever market conditions. Maternal brothers to Lot 148 are working for Dieder Ranch, Dallas Schott, Tim Schmidt and Craig Braaflat.

Lot 148, Ellingson Cowboy Up 8156.

Sitz Tradition RLS 8702, Lot 148's great-grand sire. Clint Dieder owns a maternal brother to Lot 148.

You would have to travel many miles to find a bull that can even come close to matching the amount of true natural thickness and substance this bull possesses. He is one of the stoutest bulls we have ever raised, packing an unreal amount of performance into an ideal-sized package built like a freight car. He weighed 1,010 pounds at weaning to earn a 122 ratio and honors as the second heaviest of his contemporaries. His genomics have verified his performance merit, ranking him in the first percentile for weaning weight and the second percentile for yearling and carcass weight. He has the outcross genetics of Motivation, Scotsman and Providence on his bottom side to make him usable in many matings. An individual with his level of genetic superiority deserves strong consideration beyond his natural service duties. A maternal sister sold to Clarence Tays and Sons.

SAV Blackclass 009

Left: Ellingson Top Shelf 5050,
the \$50,000 co-top-selling bull
from our 2016 sale.

Plateau sons have long been in high demand by progressive cattle producers. He sired our top-selling bulls in both our 2014 and 2016 sales. We used him again after a few years of absence as his daughters have matured into some of our best young females. His dam is a front-pasture cow and is still in production at age 13.

Plateau injects chart-topping performance into his calves. His sons' gain on test is at the top of the breed, as has been attested to by feeders who have fed them.

In the new foot score EPDs, Plateau ranks as the leader of the Angus breed for both claw set and heel depth.

He is owned with Maher Ranch and Pro Cattle Company and leased to Genex CRI.

Dam's Nursing Ratio: 2/102 \$W: +52.83 \$B: +156.74

Lot 167 is a top pick, even though he gives up some age to his contemporaries. He earned a weaning ratio of 106 against strong competition. He exemplifies the traits of volume, growth and soundness that have made the Plateau sons in high demand. His dam is ideal sized with lots of body, femininity and a picture-perfect udder and feet. Don't miss this bull, as he could end up being one of the bargains of the sale.

Dam's Nursing Ratio: 5/106 \$W: +51.08 \$B: +59.78

The Plateau-Substance mating has proven to work time and time again. This is a son of an elite Rosetta dam that has a nursing ratio of 5/106, a yearling ratio of 3/108 and a ribeye ratio of 3/105. She is a full sister to Ellingson Superior 0031, the \$14,000 feature in our 2011 sale that served as a longtime herdsire at Lund's B Bar Angus. His mother is best known as the dam of Ellingson Starman 4157 that is featured at Alta Genetics. Another son was the \$18,000 selection of Ken and Mary Schmidt in 2014.

Ellingson Starman 4157, Lot 168's maternal brother.

EA Emblynnette 6138, a maternal sister to Lot 169's dam.

Ellingson Top Shelf 5050, Lot 172's sire.

Dam's Nursing Ratio: 6/101 \$W: +53.99 \$B: +153.35

If you like to buy bulls out of proven and predictable dams, take a close look at Ellingson Plateau 8592. His Pathfinder dam by Final Answer is a modest-framed female with lots of depth, as well as a picture-perfect udder. She has a production birth ratio of 6/98, a nursing ratio of 6/101 and a yearling ratio of 5/103. A maternal brother is working for Stan Schlosser.

Rhett Abernathy bought an \$18,000 maternal brother to Lot 173 in the 2018 sale.

Kelly Dressler also owns a maternal brother to Lot 173.

Cody Staiger (right) selected a maternal brother to Lot 173. He is pictured with Jeremy Strommen of ST Genetics.

Eric and Sam Knapp own a maternal brother to Lot 173. Sam is a former Ellingson Angus intern.

Chad had the privilege to judge again at the National Western Stock Show in 2018. He and friend Steve Mohnen (below), who served as his associate judge, evaluated the National Simmental and SimGenetics pen shows.

We are excited to share with you the first progeny of Koupals B&B Fort Knox 2077, an outcross, performance option for our commercial customers.

His progeny are large outlined with added softness, rib shape, growth and near-perfect heel depth and claw set. Wherever Fort Knox has been utilized, his progeny have made a name for themselves in terms of performance.

We are excited to incorporate Fort Knox's first daughters into our breeding program, as we feel they will be easy keeping and have excellent foot quality. He is backed by four generations of Pathfinder dams from the time-tested Koupal cowherd.

Fort Knox is a featured member at the Alta Genetics A.I. stud.

Ellingson Fort Knox 8169 is a great way to lead off the first Fort Knox sons to ever be offered at Ellingson Angus. He has a rugged, masculine look that should please progressive commercial cattlemen. His Pathfinder dam by Final Answer never fails to bring home one of the best calves each fall. She has a production nursing ratio of 6/105, a yearling ratio of 3/105, a ribeye ratio of 3/106 and a 364-day calving interval. A maternal brother was a highlight in our 2014 production sale and the \$17,000 selection of McPherson Angus of South Dakota. Other maternal brothers are working for Tuhy Ranch and Tom Waldo. Lot 174's maternal sister was the \$19,000 top-selling female in our 2015 sale, selling to Van Zee Cattle Company. Another maternal sister is also working here in our own herd.

Lot 174, Ellingson Fort Knox 8169.

Koupal Juneau 797

Koupal Ebonette 734

OCC Juneau 807J
Koupals Elba 187
SAV Initiative 4406
Koupals Ebonette 545

Advance has quickly earned his spot as one of the most prominent calving-ease and maternal sires in the Angus breed today. His ability to sire light-birthweight calves with excellent calf vigor has made him a real rancher-friendly sire.

His daughters have outstanding structure, fleshing ability and some of the feature progeny in this sale.

He has extra width and squareness for a calving-ease sire. This is compounded with flawless structure and backed by the highly productive Ebonette cow family. He and his offspring are perfect fits for our breeding goals.

We own Advance with Lindskov-Thiel Ranch and Koupal Angus.

Left: Ellingson Authorize 7057, the second high-selling bull in 2018 at \$77,500 to ABS Global.

This is a massive-middled Accelerate son that should be suitable for use on virgin heifers. His genomic and performance tallies identify him as a strong calving-ease candidate and rank him near the top of the breed for heifer pregnancy. His dam is a maternal sister to the \$20,000 Ellingson Icon 5062 that is owned with Alta Genetics and Diamond J Angus.

The Ellingson Angus Team

Jacob Ellingson

After working for us several summers and after school, our nephew, Jacob, joined us full-time after graduating from Bismarck State College in May. He is a talented welder and responsible for a lot of the handiwork around the ranch.

Jameson Ellingson

Jameson is taking classes at Bismarck State College and working for us full-time. He also launched a part-time trucking venture this fall and has helped transport many customers' feeder calves and fat cattle to their new homes.

Stetson Ellingson

Stetson graduated from college in May and joined the ranch full-time. He knows the cowherd inside and out. He is responsible for many of our operation's mating decisions, as well as all of the footnotes in this catalog.

Sancho Jacobs

We were lucky to have Sancho Jacobs on our team for three years. This fall, he returned home to join his parents in their family operation near Morristown, S.D. We miss him dearly, but are excited to see him pursue his dreams.

Seb Jacobs

Seb has worked alongside us for nine years and has truly become part of our family. He is hardworking and reliable and helps make the world go round here each day. He and his wife Nicole welcomed a new son, Blaise, in December.

SAV Final Answer 0035

EA Pride 346

Sitz Traveler 8180

SAV Emulous 8145

Sitz Alliance 6595

EA Pride 114

Many astute cattle producers have proclaimed Ellingson Boardwalk 3032 as the best son of Final Answer. His dam may be the best cow to ever walk our pastures. His first daughters replicate her productive, easy-doing, broody look.

His ability to sire light-birthweight progeny that develop into wide-tracking, high-volume yearling cattle is remarkable. His sons have been maintaining their condition exceptionally well in the breeding pasture.

Again this year, this sire group is very uniform, from the first to the last bull.

Boardwalk is a model Angus sire that exemplifies the qualities that have made the breed popular.

We own him with Maher Ranch and Wright Charolais and Angus.

SAV Final Answer 0035
Prides Pita of Conanga 8821
SAV Net Worth 4200
Boyd Forever Lady 5125

Authority was selected as the high-selling bull from the 2015 Boyd Beef Cattle Sale. He consistently sires uniformity amongst his progeny. They are modest in their frame score with excellent base width and volume.

He comes from the Forever Lady cow family that has been a household name for making cattle that are maternally driven and designed for real-world cattle producers. He combines Capitalist, Net Worth, EXT 6106, Right Time and Traveler 23-4 in his pedigree.

His first daughters are some of our favorite females in our bred heifer pen.

Authority is owned with Lindskov-Thiel Ranch, Potts Brothers Farms, E/T Farms, Boyd Beef Cattle and Semex.

Dam's Nursing Ratio: 1/105 \$W: +\$4.88 \$B: +162.69

EA Queen Dolly 8082 is hands-down the fanciest heifer calf that has ever been offered for sale in our annual production sales. She proudly represents the first calfcrop of her \$130,000 ST Genetics sire that has taken the Angus breed by storm. She is long sided, feminine designed and wide down her top and in her pin set. She earned a weaning ratio of 105 coming off her 2-year-old dam. Homestead, Advance, Identity, Final Answer and Traveler 004 all align in the most immediate generations of her pedigree. The Remedy and Advance daughters have been all the rave since they've become wet; however, we believe the Homestead daughters will be even better. Her combination of phenotypic traits and genotypic tabulations give her a strong chance of earning a donor roster spot some day.

Dam's Nursing Ratio: 4/103 \$W: +76.52 \$B: +126.83

EA Blackclass 8328 is one of Stetson's favorites in the offering. She portrays her sire's maternal capabilities well. She is designed nearly flawlessly and has the type and kind to immediately grab your attention as soon as you enter her pen. She is feminine and smooth designed with added extension, rib shape and a powerful top and rear quarter. Her dam is a model Angus female with excellent structural soundness, udder and foot quality, angularity and depth of side. After you study her powerful physical display and look at her genomic and EPD tabulations, it is a no-brainer that she belongs in an elite category. She ranks in the second percentile for CED, the first percentile for birthweight, the 19th percentile for weaning weight and the fourth percentile for yearling weight. Her curve-bending EPD spread and strong dollar indexes offer plenty of mating flexibility.

Dam's Nursing Ratio: 3/102 \$W: +69 \$B: +154.37

Here is a well-balanced member of the Abigale cow family out of a full sister to the Alta Genetics sire Ellingson Top Gun 5049. Her dam has a production nursing ratio of 3/102, a yearling ratio of 1/115 and a ribeye ratio of 1/110. She boasts a strong EPD performance spread with one of the highest marbling EPDs in the sale. A maternal brother was one of the top-ratioing bulls of his calfcrop and is working at the Wanner Ranch. A maternal sister was selected by Knapp Ranch last year.

BW: 76 205 WT: 752

Dam's Nursing Ratio: 2/104 \$W: +77.30 \$B: +182.17

EA Ida 8439 is a powerhouse female that offers one of the biggest EPD spreads out of everything in this entire sale. She ranks in the top 1 percent for weaning and yearling weight, the top 10 percent for carcass weight, the top 25 percent for marbling, the top 2 percent for \$W and \$B and the top 1 percent for \$F. She earned a birth ratio of 100 and a weaning ratio of 115. Her outcross ancestry gives you another reason to mark her high on your list. A full brother was selected by Todd and Carmel Miller last year.

EA Queen 8149 is one of the distinguished performance members of her calfcrop and the only daughter to be offered from the popular ABS sire Ellingson Chaps 4095. She ranks in the top 1 percent for weaning, yearling and carcass weight, the top 25 percent for ribeye, the top 1 percent for \$W and \$F and the top 10 percent for \$B. Her genomics ranked her in the sixth percentile for weaning weight and the fourth percentile for yearling weight. Her dam is a powerful cow that boasts a nursing ratio of 3/114. She traces back to the Pathfinder sire Tehama Blackcap Revolution, whose influence has become highly sought after. This female offers as much pure rib shape, mass and power as any in this year's sale offering.

Lot 230, EA Emblynette 8806.

EA Emblynette 8806 is a powerful heifer calf. She is a direct daughter of Remedy, the sire of many daughters that have started to make names for themselves. Her granddam and great-granddam both have served as anchors of our donor program. Her granddam is a maternal sister to the \$42,000 Ellingson Format 2205, the high-selling bull in our 2013 sale and an individual that has proven to be a potent maternal masterpiece. Lot 230 is wide based and boldly sprung and has a distinctive brood-cow look. This female has what it takes to enter an embryo transplant program herself.

Nursing Ratio: 4/109 \$W: +56.56 \$B: +122.31

There is no better way to begin a new tradition of sharing some of our most elite donor dams with the public than by leading off with EA Lucy 2218. She is without question the best Lucy female we have raised. She has earned Pathfinder status with a nursing ratio of 4/109. Some of her most noteworthy progeny include resident herdsire Ellingson Roundup 6206, which had one of the heaviest weaning weights ever on our ranch, and EA Lucy 5089, which has an average nursing ratio of 111 on her first two calves. We have many embryo transplant progeny due this spring, some of which should have the capability to lead off our 2020 offering. Lot 242 is a powerful female with intriguing balance, structural soundness and a unique pedigree that you won't find anywhere in the world. Being a direct Blackcap Revolution daughter out of Territory's full sister and having Thomas Lucy 1041 for a great-granddam makes this cow a rare genetic treasure. She has so much to offer and is one that is hard to part with. She sells safe for a mid-March calf sired by Koupal Advance 28, which will add a new generation of superior maternal traits to the mix. We reserve the right to two future IVF aspirations at the new owner's convenience and our expense.

Lot 243, EA Rosetta 1127.

Nursing Ratio: 4/106 \$W: +65.86 \$B: +122.51

This will be one of the few opportunities you ever have to purchase a direct daughter of the Pathfinder sire Territory, especially one of this caliber. EA Rosetta 1127 has separated herself from the pack on all levels. She has captivated visitors year after year with her incredible phenotype, rib shape, foot quality and udder. The most impressive thing about her, however, has always been the amazing calf she has at her side. Her sons have always been in high demand and include the \$15,000 Ellingson Lariat 4011, the \$17,500 Ellingson Forage Converter and the \$16,000 Ellingson Roughrider 7234. She has a production nursing ratio of 4/106, a yearling ratio of 2/105, an IMF ratio of 4/109 and a calving interval of 366 days. Her first year of production she had twins, so their data is not included in her nursing ratio, but the calf she raised had a weaning ratio of 114 that year. Her dam and granddam are two of our best Rosetta females. Her dam is a sister to Ellingson Superior 0031, one of the best maternal sires we have ever raised and a high-selling feature in 2011 selling to Lund's B Bar Angus. She sells safe in calf to Ellingson Authorize 7057 for a late-February calf. We reserve the right to two future IVF aspirations at the new owner's convenience and our expense.

Nursing Ratio: 4/103 \$W: +55.87 \$B: +97.79

EA Emblynnette 2091 is the easiest doing female that we've had forage on our operation. She is always obese, no matter the time of the year or what her diet is. Interestingly, she still is one of the most productive cows as well. Her combination of softness, depth and productivity is impressive. She has a nursing ratio of 4/103. She is a maternal sister to the dam of the \$20,000 Ellingson Icon 5062 that is working for Diamond J Angus and Alta Genetics. Icon is a sire we have utilized with great success on large commercial heifer projects. Combining Scotsman with Territory and the Emblynnette cow family is the recipe to build a foundation from. Lot 246's outcross pedigree lends itself to a lot of mating flexibility for most programs. She has been a great embryo producer, and we are expecting a number of progeny to be born throughout 2019 in both our spring- and fall-calving herds. She sells safe in calf to S Powerpoint WS 5503 for an early-May calf. We reserve the right to two future IVF aspirations at the new owner's convenience and our expense.

FROM THE HEART OF OUR CUSTOMERS' HERDS

Commercial Females

We're excited to include a commercial female division in our sale to showcase some of the producers who have an Ellingson Angus bull battery. Throughout the year, we work closely with Jim Erickson at Stockmen's Livestock in Dickinson to market many customers' cattle. Jim knows the cattle in the offering and can be of assistance to those interested in learning about them. The cattle are broody, feminine, replacement-quality females from herds that have long histories of producing profit-oriented cattle. The females are bangs vaccinated and dewormed and have had three rounds of modified-live vaccination. The bred heifers have also all had their ScourGuard vaccine. The cattle will be available for viewing beginning Jan. 30. Contact us, the producers or Jim Erickson at (701) 290-4861.

517-636

Diede Ranch, Richardton, ND

120 ANGUS HEIFER CALVES:

These heifers are the rancher's kind. They are big-bodied females that will make profitable cows. Their dams

are known for weaning big calves without being pampered. The structural soundness of these females will ensure their longevity. Their steermates have comprised one of the premier selling groups in the Superior Livestock Bighorn Classic Sale numerous years. The heifers are sired by sons of Roughrider, Resource, Plateau, Earnan, Advance and Identity. Dienes purchase only top-end bulls and have used A.I. for many years. Their cowherd is influenced by Bandwagon, Territory, Cowboy, Net Worth and Substance. The heifers have USDA-approved EID tags. The average weight is anticipated to be 740 pounds.

Clint & Heather Diede:
(701) 878-4201

Nearly 600 high-quality commercial Angus and black baldy heifers are up for grabs on Feb. 2. Don't miss this chance to share in the maternal excellence provided by some of our longtime customers.

637-716

Gullickson Ranch, Cannon Ball, ND

80 ANGUS HEIFER

CALVES: The Jay and Salena Gullickson family is bringing heifers to the sale for the second time. This is a set of broody females with excellent maternal strength. They run a well-disciplined cowherd that always weans a big set of calves that are sought out by top feeders. The heifers are sired by sons of Earnan, Resource, Active Duty, 4X13 and Gridiron. The cowherd is greatly influenced by Traveler 004 and Density bloodlines.

Jay & Salena Gullickson:
(701) 471-2439

717-836

Katus X7 Ranch, Watauga, SD

120 ANGUS & BLACK BALDY BRED HEIF- ERS:

Katuses have a history of selling top-quality bred heifers. They have purchased some top Advance, Resource, Earnan, Identity, Power-point and Territory sons and used them A.I. These females will be self-sufficient and produce calves that have gainability. Katuses background their steers and sell a set that always tops the market. The heifers have USDA-approved EID tags.

Lots 717-766: 50 black-white-face F1 bred heifers. The majority are home-raised and the rest are from one reputation herd. They are A.I. bred to Koupal Advance 28 and due Feb. 26-28.

Lots 767-816: 50 Angus bred heifers that originate from the Katus X7 Ranch and the Brady Ham Ranch. Many are A.I. sired. They are A.I. bred to Koupal Advance 28 and due Feb. 26-28.

Lots 817-836: 20 Angus bred heifers. They are pasture bred to the \$21,000 Ellingson Progressive 7170 and due starting March 8 for 30 days.

Scott & Heather Katus:
(701) 455-3715

The commercial heifer offering includes both high-quality bred and open heifers from some of our longtime customers.

Real-World Performance Genetics from Ellingson Angus!

Each year, the Ellingson Angus "Real-World Genetics" Production Sale held the first Saturday in February is one of the most anticipated sales of the spring bull sale season. This family-owned and operated ranch is one of the top programs in the business, with **Genetics that Perform**, a **Program Focused on Customer Success** and **People Committed to Developing a Personal Relationship with Every Customer!** Once again this year, purebred and commercial producers from throughout the world will be at Ellingson Angus to invest in genetics that have proven to work around the globe. This is an event no one will want to miss.

Every year the quality grows, and this year will see as many big-time herdbulls being offered as ever. Every sire group represented has multiple features that are rising to the top and will no doubt be the kind producers will admire for their power and performance with pedigrees that run deep in Ellingsons' predictable genetics. These bulls are developed to express their genetic potential to perform, yet maintain a condition all producers can appreciate. They are truly backed by one of the breed's strongest cowherds with selection pressure placed on sound, functional traits that require superior feet and legs with ease of fleshing without sacrificing performance or eye appeal. Everyone should make it a point to go through the Ellingson females sometime. They are impressive!

Regardless of the sire group you go through at Ellingson Angus, you will find bulls to fit any program's needs. It is a unique opportunity to find a set of bulls with this kind of impressive EPD profiles and pedigrees that will work in almost any situation. Each year, prominent purebred programs and A.I. studs select bulls from Ellingson Angus due to the strong reputation of the Ellingson family and the kind of genetics they produce year in and year out. The industry's top commercial cattle producers also turn to Ellingson Angus for their herdbull needs, as they know the commitment level of the Ellingson family to work with them throughout the year in adding value to their own calfcrop, and they also appreciate the genetic flexibility this program offers.

Female buyers will be intrigued with the chance to invest in proven Ellingson donors this year. For the first time ever, a set of donor females will sell in their entirety! These females have produced top-end progeny already and will have an influence in the Ellingson program for years ahead. If you are looking to invest in front-pasture kind of females that offer tons of earning power, you will want to study these donors. In addition, there will once again be a set of spring yearling replacement heifers selling that represent the same top-end genetics as the bulls selling and will no doubt fit into any progressive program.

It is always a pleasure to work with Chad and Julie Ellingson and their entire family on this powerful sale offering. For those of you in this business in search of a program with the people you can develop a long-term relationship with, here is your opportunity. You will not be disappointed. If I can help discuss the genetics that are being offered this year, please don't hesitate to give me a call at (918) 510-3464.

Sincerely, *Rance Long*
